

POISONING | INGESTION | OVERDOSE

- Routine Medical Care
- Protect Yourself! - See HazMat [page 159](#)
- Identify substance - Bring any containers, labels or a sample (if safe) into the hospital with the patient. Determine type, amount and time of the exposure.
- **Consult the Base Physician:**
 - If **organophosphate poisoning** suspected
 - If **calcium channel** or **beta blocker OD** suspected
 - For treatment options for specific exposures
- Remove contaminated clothing. Brush off powders, wash off liquids with copious amounts H₂O
