Dust Issues in the Livermore Area
mining operators to improve the situation.

CDAA is committed to working with other agencies, the community, and

circumstances and mining operations closer to Isabel Avenue.

Last summer's dust issues were the culmination of unique environmental

- of air quality standards.
- BAAGMD inspectors, investigators, and appropriate issues violations
- established and enforced by BAAGMD.

Legally established regulations for the control of fugitive dust,

Existing SMRs provide conditions to minimize dust consistent with

authority granted in ACSMO, SMR or reclamation plans.

Initiate enforcement actions when mining operations exceed

Surface Mining Permits (SMP) and reclamation plans.

Monitor County mining operations to ensure they operate consistently

CDAA's Neighborhood Preservation and Sustainability Department's Role:

REVIEW OF NOVEMBER 17, 2015 MEETING
Review and reclamation process currently underway
plans, which will be incorporated into SWPs through periodic
required the mining operators to prepare the first dust control
creation of a system to respond to future dust complaints
Development of a Dust Working Group
Agency and operator responsibilities, and
Program to monitor dust to identity sources and activities
Potential sources and activities generating dust
Mining operators, city and state agencies discussing:
Multiple coordination meetings with the Supervisor's office,

SUBSEQUENT COORDINATION
RECOMMENDED APPROACH

County will continue to coordinate with the Dust Working Group (Supervisors office, local and state agencies, and mining operators) to ensure dust issues are addressed.

County will continue to coordinate with the Dust Working Group (Supervisors office, local and state agencies, and mining operators).

County will continue to monitor the mining operators' annual reporting and periodic reviews.

County will continue with existing SMPs and reclamation plans (annual compliance with existing SMPs and reclamation plans).

County will continue with mine operators and BAAWD Regarding dust concerns consistent with the protocol discussed.
