Focus on: Food Recovery

An estimated 50 million people in the United States are food insecure, with 47% of low-income families in Alameda County facing food insecurity. Yet, shockingly, an estimated 70 billion pounds of food goes to waste each year—though much of it is still edible. Community leaders show us that it doesn’t have to be this way. Earlier this year, Santa Clara county hired Food Shift to research where and why food is being wasted, and to identify solutions to reduce waste. Collaboration and education are key to implementing successful programs to reduce food waste, as illustrated by the Green Gloves composting program in Oakland Unified School District. OUSD has also developed a vision for district-wide food recovery through the coming Central Kitchen project, which will provide children with nutrient rich meals from locally sourced food, and insure that leftover food is distributed throughout the community. All In Alameda County looks forward to designing a comprehensive food recovery solution for our county in 2016.

All-In October!

10/2 Meeting Summary
We had a great meeting! The Governance Subcommittee presented their final governance structure proposal, which was approved by the general membership. Please submit nominations for steering committee members if you haven’t already. The RFP for community listening sessions was distributed and applications are due October 26. To close the meeting, we broke out into study teams to cover the following topics: CalFresh, Launching and supporting small entrepreneurs, Living wage/Local hiring initiatives, Housing and gentrification, and Asset development & wealth building.

Focus on: Food Recovery

10/2 Meeting Report Out
Support Food Shift’s Alameda Kitchen!
Stuff To Do, Stuff To Read
