Highest Foreclosure and Abandonment Risk Areas as Determined by HUD
Urban County CDBG Entitlement Jurisdictions

The Estimated Foreclosure and Abandonment Risk Score (EFAR Score) was compiled by the US Department of Housing and Urban Development (HUD) from multiple data sources including, but not limited to: Foreclosure rates, unemployment rates, home price decline since peak housing costs, sub prime mortgages, income levels, and residential vacancy rates. HUD prepared these scores for each census tract throughout the United States, and awarded Neighborhood Stabilization Program funds based on the compiled EFAR Score and grantee size. Census Tracts with scores of four or lower are not shown on this map.
