

## Idle Reduction: Regulations and Technology Solutions

Please join us for a free **Idle Reduction: Regulations and Technology Solutions** seminar in San Francisco on **Wednesday, August 4th, 2010 from 2-4 pm.**

This seminar will provide an overview of current air quality regulations, funding opportunities and technology solutions for fleet vehicles, mobile electric power and generator replacements. This seminar is for police, utilities, airports, ports, school districts, construction fleets and generator-powered equipment users as well as decision makers within your organization who are interested in learning how to reduce fuel usage and carbon emissions using idle reduction technologies. **On-site space for this free workshop is limited, so please REGISTER soon at: <http://idlereduction.eventbrite.com/>**

### Topics include:

- Idle Reduction: Air Quality Impacts and Regulations
- Idling Issues: Fleet Priorities and Case Studies
- Technology Solutions: Save Fuel and Reduce Your Carbon Footprint
- Funding opportunities
- Q & A

**Speakers** include **Devin Scott**, CEO, EnergyXtreme, **Brent Rudin**, Supervising Air Quality Specialist with the Bay Area Air Quality Management District, **Allison Ellingson**, Regional Account Manager, EnergyXtreme and opening remarks from **Damian Breen**, Strategic Incentives Director for the Bay Area Air Quality Management District and **Vandana Bali**, Manager, San Francisco Clean Cities Coalition and Clean Vehicles Program Manager, SF Environment.

**Partners:** Bay Area Air Quality Management District, San Francisco Clean Cities Coalition, East Bay Clean Cities Coalition, Silicon Valley Clean Cities Coalition, EnergyXtreme, Business Council on Climate Change, American Lung Association in California, Breathe California and SF Environment.

**Why?** Idling wastes money, wastes fuel, contributes to air pollution and negatively impacts our health.
