

# CCA FEASIBILITY STUDY FOR ALAMEDA COUNTY RESULTS AND Q&A

JUNE 1, 2016

MRW & Associates  
Oakland, California  
[mef@mrwassoc.com](mailto:mef@mrwassoc.com)  
510.834-1999

# TONIGHT'S PRESENTATION

- Highlights of results
- Issues raised at last month's meeting
- Q&A

# CONCLUSIONS

- Competitive with PG&E's retail rates
- Increasing RPS purchases can be cost-effective
- Carbon reduction goals need more than just increased RPS purchasing to be met
- Lots of options for encouraging energy efficiency
- Can be a positive factor in economic development
- Legislative/Regulatory risks are the most serious

*feasibility study ≠ long term plan*

# THREE SCENARIOS

1. **Minimum RPS Compliance: 33% ⇒ 50% qualifying renewables**
2. **More Aggressive: Initially 50% with lower GHG emissions**
3. **Ultra-Low GHG: 50% ⇒ 80% by year 5**

# RESULTS: SCENARIO 2 (ACCELERATED RPS)

# 100% GREEN SURCHARGE

CCA	Rate Option	Increment Above Default Rate
Marin Clean Energy	Deep Green	1¢/kWh
Sonoma Clean Power	EverGreen	3.5¢/kWh
CleanPowerSF	SuperGreen	2¢/kWh
Lancaster Choice Energy	Smart Choice	\$10/month
Potential Alameda Co. CCA	TBD	~1.5¢/kWh

# WHAT ENERGY EFFICIENCY PROGRAMS COULD A CCA DEVELOP?

- Run its own programs
- Increase participation rates in existing initiatives
  - PG&E programs
  - BayREN programs
- Leverage local government capacity to increase energy efficiency participation
  - Integrate energy efficiency (and distributed energy) with core City/County planning activities
  - More stringent codes and standards
  - Promote the use of market-ready funding and financing mechanisms

# MACROECONOMIC IMPLICATIONS

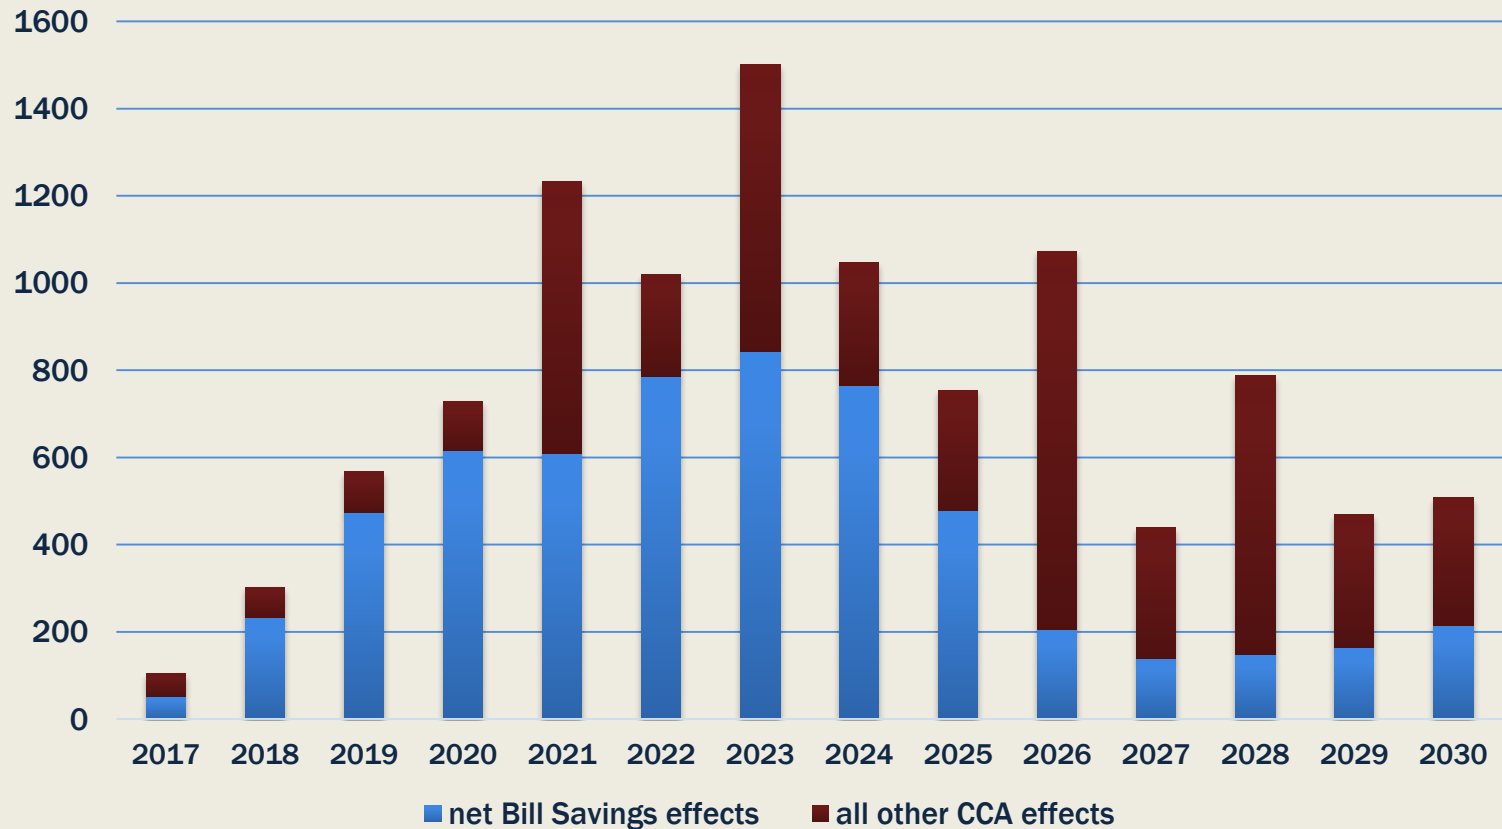

Alameda Co. CCA Scenario 1 Total Jobs Impacts by Source

# MACROECONOMIC IMPLICATIONS

## Total Job Impacts, Scenario 3

# CONSTRUCTION JOBS IN 2023

CCA Scenario	Jobs in Construction Sector		Jobs Associated with Collective Bargaining Agreements	
	Direct	Total	Direct	Total
1	136	440	27	88
2	137	432	27	86
3	154	326	31	65

# ISSUE: WHY SO LITTLE GHG SAVINGS?

# ANSWER: PG&E HYDROPOWER

ENERGY RESOURCES	PG&E 2014 POWER MIX (Actual)	2014 CA POWER MIX* (For Comparison)
<b>Eligible Renewable:</b>	<b>27%</b>	<b>20%</b>
• Biomass and waste	5%	3%
• Geothermal	5%	4%
• Small hydroelectric	1%	1%
• Solar	9%	4%
• Wind	7%	8%
<b>Coal</b>	<b>0%</b>	<b>6%</b>
<b>Large Hydroelectric<sup>1</sup></b>	<b>8%</b>	<b>6%</b>
<b>Natural Gas</b>	<b>24%</b>	<b>45%</b>
<b>Nuclear</b>	<b>21%</b>	<b>9%</b>
<b>Other</b>	<b>0%</b>	<b>0%</b>
<b>Unspecified**</b>	<b>21%</b>	<b>15%</b>
<b>TOTAL</b>	<b>100%</b>	<b>100%</b>

“Normal” v. drought

**What was “normal” is not likely to be so in the future, thus GHG savings likely**

# ISSUE: WHY SO LITTLE LOCAL RENEWABLES?

# EXPLORED 50% LOCAL RENEWABLES

# QUESTIONS?
