Governor Newsom issued Executive Order N-33-20 directing all residents to heed immediately to current State public health directives to shelter-in-place (SIP). While school closures ensued, child care was deemed part of the essential infrastructure and workforce. Since the inception of SIP, the Alameda County Emergency Child Care Response Team has actively worked to develop a coordinated child care ecosystem for the intake and referral process. This data dashboard highlights key features of the system including existing care in Alameda County. The dashboard consists of two parts 1) Alameda County Subsidy* Utilization and 2) Detailed characteristics on families who have utilized the universal intake and referral process. Since the SIP Order, demand for child care has fluctuated and will continue to do so as health orders and economic conditions change.

**ALAMEDA COUNTY SUBSIDY* UTILIZATION**

In total, 2,220 children are receiving subsidies

*Subsidies illustrated in this data set reflect funding from the California Alternative Payment Program and Alameda County Social Services Agency to children and families during COVID-19.

- 42

**Single Parent Households**

- 1,670

**Gender Distribution**

- Female: 49.4%
- Male: 50.6%
The County convened a response team to evaluate and respond to the impacts of COVID-19 on the child care field and assure essential workers had access to care during this unprecedented time. The following data elements are reflective of the specific coordinated effort of the Response Team to support families and child care providers during the COVID-19 pandemic. “Alameda County Department of Public Health Guidance for Child Care and Preschool Programs,” March 19, 2020 provides that “ideally, child care should be provided in the child’s home, by household members, without exposure to other children or ill individuals.” The volume of referrals we have received reflects that families are employing this strategy when it is an option. For essential workers for whom this is not possible, the Alameda County Emergency Child Care Response Team has developed a coordinated child care intake and referral process. Data reflected below are prior to targeted subsidies being made available for essential workers. Since the shelter in place order, demand for child care has fluctuated and it may continue to do so as health orders and economic conditions change.
Families have filled out the intake form. In total, care has been requested for 2,522 children.

- Orange: Number of Child Care Requests
**CHILD CARE SUPPLY**

All open licensed child care providers are asked to report their vacancies to their local Resource and Referral Agency. The Alameda County Emergency Child Care Response Team is compiling the data from the three Resource and Referral Agencies to better understand the number of open sites and vacancies countywide.

<table>
