

# Hitch a ride

**& support the local green economy**

**Piggyback on Alameda county contracts to get great pricing on green products!**

## How does it work?

Alameda County has contracts with various suppliers to purchase green products. If a contracted supplier agrees to allow child care providers to "piggyback" on the County contract, then providers can purchase green products from that supplier at the price that the County already negotiated.

## What green products can child care providers buy?

The company JC Paper can supply providers with janitorial paper and asthma-safe disinfectants. The company Give Something Back can supply providers with office paper.

## How do I get started?
