Census Data For Community Analysis

Do you want to learn how to better access data
about your community?

Join us for the Census Data
For Community Analysis Workshop!

This workshop reviews the basics of using Census
Data to capture the key demographic, social,
economic, and housing indicators that define your
community.

Some of the topics covered are:

- Importance of Census Bureau Data
- Accessing data for small-area geographies,
such as Zip Codes and Census Tracts
- Accessing neighborhood-level data to create
Community Profiles
- Obtaining the most recent data on age,
income, poverty, race/ethnicity, and other
- American Community Survey
