

Preschool Expansion Priorities for Alameda County, May 2014
Prepared by the Alameda County Early Care and Education Planning Council
(Submitted to the Early Care and Education Planning Council for approval on May 16, 2014)

The Child Development Division of the California Department of Education published Management Bulletin 99-21 in November 1999. It states that any expansion funds through the Department must comply with Assembly Bill 1857, which requires that any new funds must go to the most underserved areas of California. In order for Alameda County to be considered for Preschool expansion funding, the Planning Council must identify the most underserved areas in our county by zip code. In April 2003, the Child Development Division (CDD) published Management Bulletin 03-05, which further clarifies the process to establish priorities. It states, "The amended statute specifies that by May 30 of each year, upon approval by the county board of supervisors and the county superintendent of schools, each LPC shall submit to CDD the local priorities it has identified that reflect all child care needs in the county." In 2008, CDD amended its procedures for designating zip code priorities. For counties with 1-3 million residents, they are:

Counties with over 1 million residents (applies to Orange, San Diego, Riverside, San Bernardino, Santa Clara, Alameda, Sacramento and Contra Costa Counties):

Priority 1: A zip code qualifies as Priority 1 when: there are 40% or more eligible children underserved AND there are more than 300 eligible children underserved.

Priority 2: A zip code qualifies as Priority 2 when: there are 40% or more of eligible children underserved AND there are more than 200 eligible children underserved.

Priority 3:

Option 1: A zip code qualifies as Priority 3 when: there are 25% or more of eligible children underserved AND there are more than 100 eligible children underserved.

Option 2: All other zip codes in the County. (Alameda County's choice)

Option 3: No other zip codes in the County.

Using Fall 2012 data from the Child Development Division, along with more recent data from local Head Start Agencies and from Stage 1 subcontractors, we compared the TOTAL SLOTS (the number of preschool aged children who are in center-based subsidized care) against the TOTAL NEED (data from the AIR special census run on the number of families earning less than 70% of the state median income) by age and zip code. We subtracted the TOTAL SLOTS from the TOTAL NEED to get the SHORTAGE – an estimated number of children who still need preschool.

Three zip codes on the opposite page are designated as Priority 1 for funding; six zip codes are designated as Priority 2 and six zip codes are designated as Priority 3 (or we can do "All other zip codes in Alameda County are Priority 3 for funding").

Preschool Expansion Priorities for Alameda County, May 2014
 (Submitted to the Early Care and Education Planning Council for approval on May 16, 2014)

Zip Code	City	# of Children that Qualify for CSPP	TOTAL PT 3-5 SPACES	% Qualified Children Served	Number of Children NOT Served	% of Children NOT Served	Priority 1 (40% unserved, more than 300)	Priority 2 (40% unserved, more than 200)	Priority 3 (25% unserved, more than 100)

94566	Pleasanton	130	23	18%	107	82%			*

Additional Notes:

*Please note that the subsidized spaces for children are based on where the child lives, not where the child is served.

General Child Care Expansion Priorities for Alameda County, May 2014
Prepared by the Alameda County Local Early Care and Education Planning Council
(Submitted to the Early Care and Education Planning Council for approval on May 16, 2014)

The Child Development Division of the California Department of Education published Management Bulletin 99-21 in November 1999. It states that any expansion funds through the Department must comply with Assembly Bill 1857, which requires that any new funds must go to the most underserved areas of California. In order for Alameda County to be considered for General Child Care expansion funding, the Planning Council must identify the most underserved areas in our county by zip code. In April 2003, the Child Development Division (CDD) published Management Bulletin 03-05, which further clarifies the process to establish priorities. It states, "The amended statute specifies that by May 30 of each year, upon approval by the county board of supervisors and the county superintendent of schools, each LPC shall submit to CDD the local priorities it has identified that reflect all child care needs in the county." In 2008, CDD amended its procedures for designating zip code priorities. For counties with 1-3 million residents, they are:

Counties with over 1 million residents (applies to Orange, San Diego, Riverside, San Bernardino, Santa Clara, Alameda, Sacramento and Contra Costa Counties):

Priority 1: A zip code qualifies as Priority 1 when: there are 40% or more eligible children underserved AND there are more than 500 eligible children underserved.

Priority 2: A zip code qualifies as Priority 2 when: there are 40% or more of eligible children underserved AND there are more than 200 eligible children underserved.

Priority 3:

Option 1: A zip code qualifies as Priority 3 when: there are 25% or more of eligible children underserved AND there are more than 100 eligible children underserved.

Option 2: All other zip codes in the County. (Alameda County's choice in 2009)

Option 3: No other zip codes in the County.

Using Fall 2012 data from the Child Development Division, along with more recent data from local Head Start Agencies and Stage 1 subcontractors, we compared the TOTAL FULL TIME SLOTS (the number of children who are in full-time, center-based subsidized care) against the TOTAL NEED (data from the AIR special census run of the number of working families earning less than 70% of the state median income) by age and zip code. We split the children in two subgroups: infant and toddlers, and 5-12 years of age children. The supply data for children 5-12 years old also include afterschool slots, i.e. ASES and 21st CCLC data from the California AfterSchool Network. We subtracted the TOTAL FULL TIME CHILDREN SERVED from the TOTAL NEED to get the SHORTAGE – an estimated number of children who still need child care.

Two zip codes on the opposite page are designated as Priority 1 for funding for infants and toddlers; eight zip codes were designated as Priority 2 for infants and toddlers. All other zip codes in Alameda County are Priority 3 for funding.

Thirteen zip codes on the opposite page are designated as Priority 1 for funding for general child care for children 5 to 12 years of age; eighteen zip codes were designated as Priority 2 for funding for general child care for children 5 to 12 years of age. All other zip codes in Alameda County are Priority 3 for funding.
