Name:	BEKINS REDEVELOPMENT
Address:	760 22ND STREET
City,State,Zip:	OAKLAND, CA 94612
Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	06/06/2017
Global Id:	T10000006348
Lead Agency:	ALAMEDA COUNTY LOP
Lead Agency Case Number:	RO0003153
Latitude:	37.8128201128334
Longitude:	-122.274947647816
Case Type:	Cleanup Program Site
Case Worker:	JES
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Vinyl chloride, Benzene, Diesel, Gasoline, Naphthalene, Polynuclear aromatic hydrocarbons (PAHs), Stoddard solvent / Mineral Spriits / Distillates, Total Petroleum Hydrocarbons (TPH)
Site History:	Alameda County Department of Environmental Health (ACDEH) is providing regulatory oversight of the proposed redevelopment project located at the subject site on Assessor Parcel Number 3-25-10 (760 22nd Street) and APN 3-25-11 (2201 Brush Street) in Oakland, California. The two parcels have historically been developed as residential or commercial properties including but not limited to truck storage and vehicle repair facilities. A 7,000 gallon diesel underground storage tank (UST) and a 2,000 gallon gasoline UST were removed from the northeastern corner of the site and adjacent city sidewalk in 1986. Other vehicle maintenance and fuel related infrastructure remains at the site including (1) a below grade pit, historically used for servicing large vehicles (trucks and buses) and referred to as the oil-changing pit located in the northern portion of an existing shop building (integral with the surrounding concrete floor of the building); (2) a small raised concrete pedestal located at the east-central edge of the site in the location of a former fuel dispenser; and (3) an area of unusually low-density soil and a nearby standpipe indicative of a UST vent pipe identified at the west central edge of the site and referred to as the geophysical anomaly area (presumed to be the former location of a UST possibly used for waste oil). Subsurface investigations conducted at the site between 2005 until 2016 have identified petroleum-related volatile organic

compounds (VOCs), non-petroleum-related VOCs, and polynuclear aromatic hydrocarbons (PAHs) in soil, soil gas and groundwater. East Bay Asian Local Development Corporation (EBALDC) plans to redevelop the site with an eight-story mixed-use facility (day care and affordable multi-family) residential development as shown on the preliminary plan set entitled West Grand & Brush Street 90% Schematic Design Set prepared by Pyatok Architects and dated February 12, 2015. The project will include a second floor daycare center serving up to 130 children and ground floor offices for EBALDCs social services, daycare offices, two separate elevator lobbies (one for residential entry and another for daycare entry), and an enclosed ground level parking garage with parking for 50 spaces. Two, 3-car high puzzle lifts will be constructed near the center of the property for below grade parking. Higher floors will be used for residential living with up to a maximum of 59 affordable residential units. All units with the exception of the managers unit will qualify as affordable housing serving residents with incomes at or below 60 percent of the area median income. At the date of this letter, ACDEH understands the 760 22nd Street parcel is developed with a one-story metal shop building, two mobile trailers and associated paved parking areas and is currently rented by ONeill Trucking as a vehicle storage area. The parcel at 2201 Brush Street is unpaved and is also rented by ONeill Trucking for vehicle storage. A review of historic data in the case files and recently collected data and data evaluation indicate that there are three areas of residual contamination from releases associated with historic site use for truck storage and vehicle repair. To mitigate risks to future building occupants, the engineering and institutional controls have been proposed in the document entitled Remedial Action Plan, Properties at 760 22nd Street and 2201 Brush Street, Oakland (RAP), dated October 10, 2016 and prepared by Essel Environmental Engineering & Consulting. The RAP was conditionally approved by ACDEH on June 6, 2017.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

owner or operator of a facility subject to this part to prepare a SPCC plan in accordance with good engineering practices. No good engineering practices are referenced in Table G-5 for inspections, testing, and personnel training. Visual testing is referenced, and is adequate; however, what are the standards the facility will meet? NOTE: Industry standards are technical guidelines created by experts in a particular industry for use throughout that industry. Standards-developing organizations use a consensus process to establish the minimum accepted industry practice. The SPCC rule requires that the Plan be prepared in accordance with good engineering practice. Standards play a role in determining good engineering practice when developing spill prevention procedures and an inspection program for an SPCC-regulated facility. Implementing an inspection program based on a particular industry standard is ultimately up to the owner/operator. [Truncated]

Violation Division: Alameda County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Site ID: 53534
Site Name: OIL CHANGERS #101
Violation Date: 10-06-2016
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: APSA Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 12/02/2016. OBSERVATION: New Product Room above ground tanks (AGTs) are constructed of single-walled steel. The New Product Room does not have an oil-impermeable barrier/berm/dike at the entrance to the Room. Essentially, the New Product Room does not fully function as secondary containment as a spill from the new oil tanks would flow out of the doorway. CORRECTIVE ACTION: The New Product Room is stated in the SPCC Plan as the secondary containment structure. Therefore, the entire room shall be bermed/diked to prevent oil spill from reaching navigable waterways. ADD a dike/berm/barrier to the doorway to complete the secondary containment.
Violation Division: Alameda County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Site ID: 53534
Site Name: OIL CHANGERS #101
Violation Date: 10-06-2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.
Violation Notes: Returned to compliance on 03/07/2017. OBSERVATION: Failure to include inspections of tank supports/foundation, deterioration, discharges, and comparison records in the records of inspections (or customary business records). NOTE: The SPCC Rule requires that the facility test or inspect EACH container for integrity on a regular schedule and whenever material repairs are made. CORRECTIVE ACTION: Include the above mentioned items in the inspection log and schedule Attachment 3.1.

Violation Program:	APSA
Violation Source:	CERS,
Site ID:	53534
Site Name:	OIL CHANGERS #101
Violation Date:	10-06-2016
Citation:	22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Description:	Failure to inspect weekly, areas where hazardous waste containers are stored or transferred. The owner or operator shall look for leaking containers and for deterioration of containers and the containment system caused by corrosion or other factors.
Violation Notes:	Returned to compliance on 09/19/2017. OBSERVATION: Oil Changers does conduct daily inspections of the used oil tank with liquid level, results of visual inspection, and check if no leaks are recorded. However, weekly inspection of the used oil annular space is required to determine the presence of oil or water (or any other liquid or debris). Note that liquid (appears to be oil) appears to be present in the annular space. CORRECTIVE ACTION: Facility to add a weekly inspection that includes verification of no liquids in the annular space. If liquids are observed, the liquid shall be removed immediately and properly disposed of. Transmit a copy of one month's weekly inspection validation to ACDEH CUPA inspector.

Violation Date:	10-22-2019
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	"Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."
Violation Notes:	Returned to compliance on 10/31/2019. Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas. The SPCC has a form for inspecting each tank annually, however, the annual inspection is not being documented on the form provided in the SPCC plan. Annual inspection items are being covered in the monthly inspections. Recommend removing STI SP001 annual inspection form from SPCC plan or implementing annual inspection on this form for applicable items.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards.
Violation Notes:	Returned to compliance on 03/07/2017. OBSERVATION: Failure to test or inspect EACH aboveground tank for integrity by a person qualified in accordance with industry standards. SPCC Plan in Table G-5 states that: "all indoor tanks are smaller, shop-built tanks. Therefore, Oil changers does not plan to subject them to periodic integrity testing." This statement and practice is not acceptable per the SPCC Rule. NOTE: The SPCC rule requires that you: Test or inspect each container for integrity on a regular schedule and whenever you make material repairs; and Frequently inspect the outside of the container for signs of deterioration, discharges, or accumulation of oil inside diked areas. This visual inspection is intended to be a routine walk-around and include the container s supports and foundations. Identify in your SPCC Plan the type and frequency of testing and inspection for each container and the appropriate qualifications of personnel performing the tests and inspections. You must retain [Truncated]

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to provide systems or follow procedures to prevent overfills as described in the SPCC Plan, and/or failure to routinely test to ensure proper operation.
Violation Notes:	Returned to compliance on 12/20/2019. Failure to provide systems or follow procedures to prevent overfills as described in the SPCC Plan, and/or failure to routinely test to ensure proper operation. The facility checks the oil level in the tank daily. However, the fluid level is not checked manually to ensure that the gauge is reading correctly. Add a procedure to check overfill gauge reading to ensure it reads the fluid level correctly.

hazardous waste tank system assessment for the 300 gallon used oil tank. Transmit the report to ACDEH CUPA inspector within 30 days. If a completed inspection report can not be completed in 30 days, provide the date and tank assessor company schedule to ACDEH CUPA inspector within 30 days.

Violation Division: Alameda County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 53534
Site Name: OIL CHANGERS #101
Violation Date: 10-06-2016
Citation: 22 CCR 15 66265.195(c) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(c)
Violation Description: Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.
Violation Notes: Returned to compliance on 03/07/2017. OBSERVATION: Annular space of the used oil tank between the single wall steel and the concrete block secondary appears to have liquid (likely oil) within the annual space. There is no apparent mechanism (e.g. a valve) to drain the annular space. See Item 34. CORRECTIVE ACTION: Facility shall conduct inspections of the secondary containment structure to ensure no liquids, oil, water have accumulated. Immediately begin daily inspections of the annular space of the hazwaste used oil tank. Add this inspection item to the daily log and transmit 30 days of completed inspections to ACDEH inspector.
Violation Division: Alameda County Environmental Health

Violation Source: CERS,

Site ID: 53534
Site Name: OIL CHANGERS #101
Violation Date: 10-06-2016
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: APSA Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 12/02/2016. OBSERVATION: Containers are not provided with overfill prevention and/or overfill prevention discussion is not included in the SPCC, and/or the overfill prevention system is not tested. NOTE 1: Table G-5 discusses overfill prevention for the New Product Tanks only. Daily inspection is written to include a daily inspection -OR- an audible alarm system will be installed. None of the AGTs have audible alarm systems installed. It appears that daily visual inspections are the overfill method utilized. NOTE 2: Table G-5 does NOT discuss the overfill prevention for the Used Oil AGT in the basement. The used oil tank is equipped with a mechanical liquid level gauge. Shop personnel make daily observations of the liquid level. CORRECTIVE ACTION: Provide containers with overfill prevention, and/or include overfill prevention discussion in SPCC, and/or test the overfill prevention system and provide results. NOTE 1: Modify the Plan to discuss the actual, in-use method [Truncated]

Violation Date: 10-06-2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.
Violation Notes: Returned to compliance on 12/02/2016. OBSERVATION: Discharge prevention methods discussed in Table G-3 Containers: 1) Add: 0W-20 120 gallon AGT, 10W-30 synthetic/blend120 gallon AGT 2) Modify: 5w-20 (synthetic blend) and 5w-30 (synthetic), and ATF (synthetic). 3) Oakland CUPA is listed in Table G-8, change to ACDEH CUPA. CORRECTIVE ACTION: Update Table G-2 to accurately reflect the container size and contents at this facility. Update Table G-8 with up to date contact/phone numbers.
Violation Division: Alameda County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Site ID: 53534
Site Name: OIL CHANGERS #101
Violation Date: 10-22-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 10/31/2019. The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. The grades of motor oil are not broken out on the HMBP. Break out the grades of oil on the HMBP and resubmit to CERS within 30 days.
Violation Division: Alameda County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 53534
Site Name: OIL CHANGERS #101
Violation Date: 10-06-2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes: Returned to compliance on 03/07/2017. OBSERVATION: 1) SPCC Plan details inspections and tests in Table G-5. Facility states AGTs will satisfy UL Standard UL-142 or API 650 specifications. However, single wall new oil and double wall (single-wall steel/concrete secondary) used oil AGTs were shop constructed to an unknown standard. 2) Attachment 3.1 includes inspection and testing of the used oil overfill alarm. The used oil tank does not have an overfill alarm, only a mechanical level gauge. CORRECTIVE ACTION: 1) Verify that the unknown standard tank construction methods meet UL-142 or API 650. 2) Modify inspection log to test mechanical gauge for functionality.

Violation Division: Alameda County Environmental Health
Violation Program: APSA
Violation Source: CERS,

Site ID: 53534
Site Name: OIL CHANGERS #101
Violation Date: 10-06-2016
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 09/19/2017. OBSERVATION: The used oil filters 55 gallon drums in the garbage enclosure did not have the retaining ring properly sealing the lids. Note: The drum lids have "shower caps" to prevent oil and water accumulation on the lid and for ease of cleaning. Please continue this best management practice. CORRECTIVE ACTION: Place drum lid rings on all 55 gallon drums containing used oil filters and any other hazardous waste - this practice will prevent potential spills and rainwater intrusion.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-06-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine California Large Quantity Hazardous Waste Generator (LQHWG) of Oil Changers #101 at 640 W. Grand Ave, Oakland. Facility walk through conducted with John Denholm, environmental compliance and purchasing officer. Oil Changers generates the following waste streams: Used Oil (300 gallon steel AGT with concrete block secondary containment in basement); Used Antifreeze / Coolant (150 gallon poly double walled AGT in basement); Used Oil Filters (3 x 55 gallon drums in garbage enclosure). Safety Kleen picks up used motor oil, used antifreeze/coolant, and used oil filters. Flyers Petroleum in Newark delivers NEW oil to the facility. All violations noted in this Hazardous Waste Generator (HWG) inspection report are to be corrected within 30 days and proof of those corrections submitted to this office in the same time frame.
Eval Division: Alameda County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection

Status Date: 12/17/2020
Case Worker: EH
RB Case Number: 01-1466
Local Agency: ALAMEDA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000358
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Diesel, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Xylene
Site History: Site is undergoing redevelopment as a 7-story hotel with commercial 1st floor. The USTs and service station structures have been removed (April 2019). Excavation of impacted soil has occurred and was followed by ISCO application (pit & injection). This LOP case will remain open for the monitoring of the effectiveness of the remedial actions. The case was opened in 1989 following the discovery of a release from the UST fueling system during a 1988 site assessment conducted for a service station exchange between Texaco and Exxon. A

EXXON (Continued) **S101580163**

follow up assessment conducted in 1989 detected 11,000 mg/kg TPHg and 40 mg/kg benzene in soil; 9,500 a%g/L TPHg in groundwater; and 6,100 a%g/L TPHg and 10 a%g/L benzene in soil vapor indicating that a release from the underground storage tanks had occurred. Two gasoline USTs, one diesel UST and one waste-oil UST (WOT) were replaced in November and December 1991. Soil samples from the fuel tank pit were reported to contain up to 10,000 mg/kg TPHg and 130 mg/kg benzene. Groundwater remediation occurred from 1990 to 1993. A 1,000-gallon waste-oil UST was removed on September 22, 1997. Soil samples collected beneath the waste-oil tank were below the detection limits for many constituents with TEPH at 32 mg/kg, TRPH at 120 mg/kg and TTLC lead at 7.2 mg/kg. A P&T groundwater remediation system operated at the site from 1991 until 1996. A dual-phase extraction pilot test was performed in 2001 and found that DPE would be an effective remediation method for the site. An AS/DPE feasibility test was performed in January 2014. The test results indicates focused DPE and/or AS/DPE may be an effective remedial option. Based on the data ACDEH recomended preparation and implementation of a CAP using DPE supplemented by AS if sufficient water is present beneath the site. High intensity targeted (HIT) AS/DPE event conducted 7/28- 8/01/2014. Another HIT round performed 8/03- 8/18/2016. On-site monitoring wells destroyed in January 2019 prior to station demolition. Additional soil excavation and ISCO application occurred as part of the remedial strategy prior to hotel construction. Perimeter wells remain for monitoring the effectiveness of the remedial activities.

Case Type:	Cleanup Program Site
Case Worker:	EH
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Trichloroethylene (TCE), Benzene, Diesel, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Naphthalene, Polynuclear aromatic hydrocarbons (PAHs), Toluene, Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History:	This project was formerly named 'Millennial Hotel Redevelopment Project' and was renamed 'Uptown Moxy' at meeting of July 23, 2018. Site was formerly a Valero branded retail gasoline station- leaking underground fuel tank (LUFT) case (Case No. RO0000358)- located on the southwest corner of the intersection of West Grand Avenue and Telegraph Avenue in a mixed-use commercial / residential area of Oakland. The station has been removed and a zero-lot-line hotel is currently being constructed. The case was opened in November 2017 to address potential vapor intrusion concerns associated with residual contamination at the property. The seven story modular-unit hotel is being developed for the site. Due to the presence of residual petroleum hydrocarbon contamination, this site cleanup program (SCP)

case was created to address the change in land use from that of an active fueling station to commercial (hotel). Remediation, performed in conjunction with property redevelopment, will include removal of primary and secondary contaminant sources. Additional residual source material will also be removed to the extent practicable. Post remediation groundwater monitoring will be conducted using four perimeter wells transferred to this case from the existing LUFT case monitoring well network. The on-site wells have been abandoned and project schedule is for station decommissioning with UST system removal, soil excavation, ISCO application and groundwater monitoring. Not reported

Case Type:	Cleanup Program Site
Case Worker:	DR
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Lead, Benzene, Diesel, Ethylbenzene, Gasoline, Naphthalene, Toluene, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History:	This case was opened by Alameda County Department of Environmental Health in 2017 to investigate subsurface impacts from historic land use (including single family homes, a commercial fueling station, and installation of Bart within a right of way traversing the parcel) and develop a corrective action plan necessary to facilitate a property transaction and redevelopment of the site and an adjacent parcel, to mixed use.The commercial gas station was demolished in 2019 and the following corrective actions have been completed at the site: (1) remediation of soil and groundwater using multi-phase extraction followed by an evaluation of rebound conditions, (2) excavation of petroleum hydrocarbon impacted soil, and (3) partial excavation of soil containing lead concentrations above residential environmental screening levels. The case was closed by ACDEH in February 2020, based on information in the case file and with the provision that the information provided to ACDEH is accurate and representative of site conditions. ACDEHs closure determination was based on an analysis of risk to human health and the environment under the land use scenario as a vacant lot at the time of case closure. Risk to receptors under different land use scenarios or site configurations, were not considered in the closure determination of this SCP case. Additional excavation of lead impacted soil on the subject site is proposed in a corrective action plan prepared for a mixed-use redevelopment project located at both the 2200 Telegraph Avenue site and the 2201 Valley Street. Regulatory oversight of excavation of lead impacted soil on the parcel will be conducted under a Separate Site Cleanup Program Case No. RO3380 concurrent with site redevelopment activities that are expected to commence in June 2020.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0002435
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. In 1986 tank basin soil and a groundwater sample were collected during the replacement of USTs in a pre-existing tank basin; hydrocarbon concentrations were encountered. Sixteen soil vapor wells are reported to have been installed in 1986 and 1987 over the BART tube, located directly below the site; however, no data has been submitted. In 1992 a groundwater sample was collected from a former vadose zone well (VW-2) and

CHEVRON 9-3600 (Continued) **S106117767**

concentrations of concern were encountered; however, the location of VW-2-1 is unknown. In July 1994 product lines were removed and upgraded and low hydrocarbon concentrations were encountered. In March 2000 eight hand-augered bores were installed at the site; most bore depths were limited to 10 feet by the presence of the BART tube. In Mach 2002 wells MW-1 to MW-3 were installed on either side of the BART tube and right-of-way. In April 2012 soil bores B-9 to B-12 were installed to define the downgradient extent of the dissolved-phase groundwater plume. Groundwater was collected; however, appeared to define a deeper non-impacted groundwater zone. The groundwater plume was defined using the LTCP groundwater technical justification paper 90th percentile plume length, and conducting a downgradient sensitive receptor survey for water supply wells and potential basements that might encounter the impacted groundwater.

Potential Media Affected:	Soil
Potential Contaminants of Concern:	Lead, Total Petroleum Hydrocarbons (TPH)
Site History:	This case was opened to accommodate the potential redevelopment of the subject parcel, and an adjacent parcel, to mixed use. Site redevelopment may include ground floor residential; however, this has not been fully defined. An MPE pilot test has been approved to determine if this is a viable method to remediate the site to mix use. For the history of the adjacent parcel of the subject site, formerly a gasoline service station, please refer to the closed case (Chevron #9-3600; T060016163; RO0002435). A Station Demolition Plan is currently pending.

Local Case Number:	RO0000359
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	This UST release case has been evaluated for closure consistent with the State Water Resource Control Board Low-Threat Underground Storage Tank Closure Policy (LTCP) for petroleum related contaminants. Case closure is granted for the current commercial land use. In addition, the release included lead, chlorinated solvents, and polycyclic aromatic hydrocarbons (PAHs). Although the chemicals released at the site are predominately not chlorinated solvents, the case has also been evaluated consistent with criteria described in the Regional Water Boards Assessment Tool for Closure of Low-Threat Chlorinated Solvents, as they are relevant and appropriate for evaluating closure. The site does not meet scenarios 1 through 4; however, a determination been made that under current and reasonably expected future scenarios, the contaminant plume poses a low threat to human health and safety and to the environment and water quality objectives will be achieved within a reasonable time frame (Scenario 5). The site does not meet any of the Vapor Specific Criteria due to the lack

DAVE'S STATION (Continued) **S101624496**

of analysis for naphthalene in soil gas. Confirmation soil sampling conducted following over-excavation of the former fuel tank pit reported maximum naphthalene concentrations of 1.7 mg/kg at 10 feet and non-detect <0.010 mg/kg at the former waste oil tank location. Based on these findings, ACDEH has made a determination that the low- to no- residual concentrations of naphthalene do not present a significant vapor intrusion to indoor air risk. This site does not meet this LTCP criterion due to the lack of analysis in soil for poly-aromatic hydrocarbons (PAHs) in the 5- to 10-foot zone for remaining site soil. Based on the low levels of residual contaminant concentrations for other analytes in the vicinity of the waste oil UST (WOT), the two rounds of over excavation of the WOT location appear to have removed the bulk of the residual contamination. Thus ACDEH concludes that the potential for residual PAH soil contamination in the 5- to 10-foot zone to be present at concentrations below the LTCP media-specific numeric values listed above.

Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at https://ehgis.acgov.org/dehpublic/dehpublic.jsp. Three Stoddard Solvent USTs were removed from the site, two in 1986 and the third in 2006. Elevated concentrations of TPH-ss (to 5,500 mg/kg) were detected in soil samples. A remedial excavation was proposed and has been approved. The remedial excavation has not been implemented.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	DY
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil, Under Investigation
Potential Contaminants of Concern:	Chlordane, Arsenic, Lead, Nickel, Total Petroleum Hydrocarbons (TPH)
Site History:	Alameda County Department of Environmental Health (ACDEH) has been providing regulatory environmental oversight for the investigation and cleanup activities associated with Cleanup Site Program Case No. RO0003413 since February 2020 subsequent to referral by the City of Oakland Planning and Building Department. To redevelop the Site, environmental investigations are required to evaluate impacts to the subsurface from historic land use and develop corrective actions to reduce potential risk to construction workers, the surrounding community, and occupants of the new development. Subsurface investigations have been conducted to evaluate historical operations at the Site including but not limited to various commercial configurations such as dry-cleaning/laundry, blacksmith, wagon shop, and numerous retail such as physicians office, photo shop, jewelers. Results of these subsurface investigations has identified chemicals of concern (COCs) in environmental media (soil). To address this contamination prior to development, proposed corrective actions include remedial soil excavation and off-Site disposal of impacted soil at a permitted disposal facility. Proposed redevelopment of the Site includes a 39-story residential tower and a 4-story office retail building with one level of subsurface parking. Redevelopment will include the demolishment of the existing commercial properties and excavation of soil to about 26-32 feet below ground surface for construction of a mat slab foundation. The 0.7-acre subject site consists of two land parcels associated with Assessor's Parcel Numbers (APNs) 008-0638-006-05 and 008-0638-007-10. The current site owner is 19th & BWAY Associates, LLC however a property transaction with Behring Capital is pending. Site redevelopment activities have been permitted by the City of Oakland and will include excavation of depths of up to 32 feet below ground surface (bgs) and construction of subsurface parking and an office/retail tower; Historic land use

at the site dates back as early as 1889 and includes but is not limited to dry cleaning, blacksmith and wagon shop, office, typewriter and carbon ribbon company, physician offices, automotive, photoshop, theater, and parking lots. Historic land use at nearby properties include a brewery, planning mill, laundry, plating and polishing facility, paints, vulcanizing, plumbing supplies, and motorcycle repair. Undocumented fill material (including debris consisting of concrete, metal, glass, and wood) has been document to depths of approximately 12 feet bgs. Results from limited site investigations conducted in 2016 document chemicals of concern in soil and groundwater at concentrations above environmental risk based screening levels.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker:	UUU
Local Agency:	Not reported
RB Case Number:	01S0375
File Location:	Regional Board
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Diesel
Site History:	The San Francisco Bay Regional Water Quality Control Board (Water Board) announces a proposed soil cleanup plan for Parcel T-12, located in downtown Oakland at 601 12th Street (the Site) between Martin Luther King Jr. Way, Jefferson Street, 11th Street, and 12th Street. The proposed soil cleanup plan consists of excavation and off-site disposal of impacted Site soils. We invite any interested parties to comment on the proposed cleanup plan. Written comments are due to the Water Board at the above address by November 8, 2008. Background The Site was occupied by the old Oakland High School from late 1800s through the 1940s. The building was demolished in 1944 and replaced by a parking lot. Reported land use between 1920 and 1960 within one block of the Site has included manufacturing and machine shops, paint companies, auto-repair / service stations, printers / publishers, and dry cleaning establishments. The Site presently consists of a level asphalt public parking lot, approximately 1.4 acres in size. Surrounding land use is mix used of commercial, residential and parks. Oakland T12 LLC (T12) and the City of Oakland Community and Economic Development Agency plan to develop the Site into a 23-story high-rise office building with two levels of basement parking starting in the fall of 2008. As part of the design, the Site will be excavated to approximately 27 feet below ground surface (bgs), and approximately 60,000 cubic yards of soil will be removed. The Site is shown on the attached map and aerial photograph. The Water Board is the lead regulatory agency overseeing soil and groundwater cleanup activities at this Site Site Investigation Environmental investigations at the Site included the collection of soil samples and the installation of monitoring wells for groundwater sample collection. The Site is underlain by fill consisting of silty to gravelly sand with brick fragments ranging in depth from 4 to 13 feet below ground surface. Native material consisting of silty to clayey sands underlies the fill. Soil in a small area of the Site is impacted with lead, arsenic, thallium and petroleum hydrocarbons (oil and grease) at concentrations slightly above environmental screening levels. Groundwater beneath the site has not been impacted. Proposed

Cleanup Plan The proposed cleanup plan consists of excavation and removal of impacted Site soils. The Site hot spot soils will be excavated to the top of the native soil and disposed off-site in appropriate landfills. Confirmation soil samples will be collected from the sidewalls and base of the excavation to confirm the impacted soils are excavated and removed to the extent possible. Dust control, air monitoring and Site access controls will be implemented during soil excavation and removal activities at the Site. The excavation of soil at the Site is anticipated to take approximately 4 to 6 weeks. Truck traffic associated with the removal of excavated soil will be via 11th and 12th Streets and Interstate 980. We invite any interested parties to comment on the proposed cleanup plan. Written comments are due to the Water Board at the above address by November 8, 2008.

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Heating Oil / Fuel Oil, Lead
Site History:	In 2006, the site was being redeveloped with a multi-story office building. During construction activities, an UST was discovered and subsequently removed. Elevated concentrations of petroleum hydrocarbons were detected at the site. Several borings were installed to delineate the extent of the groundwater contaminant plume.

Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Site History:	Former body shop and vehicle maintenance facility. Operations ceased in 2018. Site redevelopment proceeding with Water Board oversight to achieve clean closure following construction completion. Structure demolition, debris removal and site grading being completed under approved Site Management Plan. Soil sampling and testing was done during site grading per the approved site management plan and TPH/metals impacted soils were removed and transported for offsite disposal. Soil vapor sampling conducted in 2019 (after site grading) revealed low levels of PCE in limited areas of the site. VIMS are being designed for Water Board approval prior to construction.

Potential Contaminants of Concern:	Waste Oil / Motor / Hydraulic / Lubricating
Site History:	A 55-gal waste oil UST hydraulic lift was removed from the site on August 19, 1996. Elevated concentrations of petroleum hydrocarbons, tetrachloroethene, and dichlorobenzene were detected in soil samples collected from the site. Additional investigation with five soil

AUTO SERVICE COMPANY (Continued) **S121475975**

borings advanced to 28 feet bgs was conducted in May 2018 to assess the extent of impacts. Naphthalene was the only VOC detected in soil at a concentration of 0.083 mg/kg (ppm) which only slightly exceeded the Tier1 ESL of 0.033 ppm. Other notable chemical found in soil included TPH as diesel at concentrations of 1,800 ppm and TPH as Oil at 6,100 ppm.

Potential Contaminants of Concern: Gasoline

Site History: The site is currently an active ARCO-brand gasoline retail station and consists of a service station building and four gasoline USTs with associated piping and dispensers. Land use in the immediate vicinity is commercial. In May 1991 Gettler-Ryan, advanced four soil borings (A-B through A-E) during a preliminary soil investigation and well abandoment prior to UST replacement. In January 1992, Roux Associates collected nine soil samples (SW-1 through SW-9) during excavation and removal of four USTs. Approximately 2,196 cubic yards of petroleum impacted soil was excavated and disposed of offsite and 10,000 gallons of groundwater removed from the excavation. Four new 10,000 gallon fiberglass USTs were subsequently installed. In February 1992, following removal of the product lines, Roux collected five soil samples (L1 through L5) from the product line trenches. Based on elevated concentrations of TPHd, overexcavation was conducted to remove additional contaminated soil. Components associated with a vapor and groundwater extraction system were installed concurrently with the installation of new product piping to facilitate future installation. In March 1992, GeoStrategies, Inc installed four monitoring wells A-1 through A-4 and one recovery well (AR-1). In June 1992, GSI installed three vapor extraction wells (AV-1 through AV-3) and one recovery well (AR-2). In June 1992, GSI conducted a vapor extraction test and a step-drawdown aquifer test to asses the feasibility of a SVE and groundwater extraction system. In February 1993, GSI installed two off-site monitoring wells (A-5 and A-6). In September 1993, GSI installed 3 air sparge wells (AS-1 through AS-3) and two vapor extraction wells (AV-4 and AV-5) and performed air sparge/vapor extraction pilot tests. In December 1993, GSI installed two additional air sparge wells (AS- and AS-5), two vapor extraction wells (AV-6 and AV-7), and two dual groundwater recovery/vapor extraction wells ADR-1 and ADR-2. Operation of the air sparge and vapor extraction system began in June 1994 and continued until December 2001 when the system was shutdown due to low concentrations. The groundwater extraction system never operated. SVE system was installed and operated from 1994 to 1998. In 1998, began biosparge operation, which ceased in 2001. The site was evaluated for case closure under the State Water Resources Control Board Low-Threat Underground Storage Tank Closure Policy. Based upon the information available in our files to date, no further investigation or cleanup for the fuel leak case is necessary at this time. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://www.acgov.org/aceh/lop/ust.htm.

Potential Media Affected:	Not reported
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Benzene
Site History:	The property is owned and being redeveloped by 1919 Crew LLC into 63 live-work residential apartment units. The Site is currently developed with one 70,000 square foot building, which was constructed in 1923 and is currently unoccupied with no onsite operations. In addition to the structure, the Site is improved with asphalt-paved parking, perimeter fencing, and associated drainage features. The subject property is bound by residential housing to the north, Market Street to the east beyond which is residential housing, St. John Missionary Baptist Church and residential housing to the south, and Myrtle Street to the west beyond which is residential housing. The Site has historically housed both residential and commercial tenants. The Site was formerly occupied by Greyhound Bus Lines and a plumbing contractor warehouse, which included onsite operations such as motor repair and painting. The property was formerly equipped with two 10,000-gallon underground storage tanks (USTs), located within the sidewalk to the southwest side of the building, along Myrtle Street. The USTs were reportedly used by Greyhound Bus Lines to store diesel prior to the 1960s. The Site was occupied by Scott Company starting as early as 1957, who reportedly used the southwest UST to store gasoline. A former fuel dispenser was reportedly located on the southwest portion of the property, near the corner of the subject property building. The USTs and dispenser were removed in the early 1980s at a time when Myrtle Street was being repaved. On May 7, 1999, the Site received closure via Letter of No Further Action from the ACDEH for the Leaking UST case. According to a Phase I environmental site assessment, prepared by AEI Consultants in 2014, solvents were stored near the southwest and southeast.corners of the Site and refrigerant oil was stored in the northeast corner of the Site.

Violation Source:	SMARTS,

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-08-2019
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Alameda County Environmental Health, Site Cleanup Program is the lead on this project. The site is a toxics cleanup site. Residual contaminated soils will be placed under the building slab. A vapor mitigation system was being installed during the inspection. Information regarding the toxics cleanup and remediation is available on the Alameda County Site Cleanup Program website. Observed onsite stormwater construction controls included straw wattles, sweeping, and hourly dust monitoring. A worker was hand sweeping the concrete driveway during the inspection. Hand sweeping the driveway was an insufficient BMP. Track out was observed in Market Street. Improve housekeeping to prevent track out. Worn out wattles were observed on Market Street. Replace the wattles. Watering for dust control was not observed. The minimal site activity during the inspection was not generating dust. The site manager was notified that track out was observed in Market Street.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Under Investigation
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Lead, Diesel, Gasoline
Site History:	Alameda County Department of Environmental Health (ACDEH) provided regulatory environmental oversight for the investigation and cleanup activities associated with Cleanup Site Program Case No. RO0003305 from April 2018 to April 2021 subsequent to referral by the City of Oakland Planning and Building Department. Subsurface investigations have been conducted to evaluate historical operations at the Site

1100 CLAY ST - LONG-TERM MONITORING (Continued) **S122356481**

including but not limited to residential dwellings and various commercial configurations such as automobile service and repair operations with associated former underground storage tanks. Results of these subsurface investigations has identified chemicals of concern (COCs) in environmental media (soil and soil vapor). Corrective actions have been completed at the Site including remedial soil excavation and off-Site disposal of impacted soil at a permitted disposal facility; and installation of vapor mitigation engineering controls to control potential vapor intrusion to indoor air. The redevelopment of the Site is currently being conducted and includes one mixed-use building approximately 156 feet tall. The building will generally be at grade, with finished floor elevations approximately matching the surrounding sidewalk grade, with an approximately 40 square foot partial basement level that daylights at the lower driveway level to the adjacent parking garage. The partial basement and first floor of the building will be utilized for retail, residential amenities and building support purposes (i.e. non-residential use). Residential apartments will be constructed over the first floor. Cleanup Program Site Case No. RO0003305 was opened by Alameda County Department of Environmental Health (ACDEH) in 2018 under a Voluntary Remedial Action Agreement with CIM Group to facilitate investigation and cleanup of chemicals of concern in the subsurface associated with historical land use at and in the vicinity of the Site and redevelopment of the site with a mixed-use commercial/residential building. The Site was underlain by 1 to 14.5 feet of fill. Chemicals of concern (COCs) detected in subsurface soil/fill, groundwater, and soil vapor beneath the Site included but were not limited to lead, total petroleum hydrocarbons (TPH), and chlorinated volatile organic compounds (CVOCs). Lead and TPH soil impacts were removed during excavation of fill across the Site during redevelopment activities and subsequent offsite investigations delineated the residual dissolved]phase TPH plume. CVOC impacts in groundwater and soil vapor were identified from off]site sources. Site development activities were completed in 2021 and included installation of vapor mitigation engineering controls (VMECs) to mitigate risk to occupants of the building from potential vapor intrusion of soil gas impacted with CVOCs into indoor air. VMECs installed at the site include: the concrete building foundation (cap); waterproofing/vapor barrier; trench plugs along utility corridors; and conduit seals to mitigate potential vapor intrusion risks from off]site vapor impacts including but not limited to tetrachloroethene concentrations detected in the former offsite boring LB]24 located adjacent south of the Site. A Risk Management Plan and VMEC Operations and Maintenance Plan have been prepared for the Site and include procedures and instructions associated with long]term maintenance and repair of VMECs installed at the Site. Strict adherence to the protocols and repair procedures outlined in both documents must be followed in order to adequately protect site occupants and users from exposure to potential residual contamination from new vapor intrusion pathways. With the provision that the information provided to this agency is accurate and representative of known Site conditions, ACDEH has determined that no further remedial action is required at the Site and therefore closed the case associated with environmental investigation and remediation (RO0003305) and opened a new case (RO0003478) to act as a document repository for long]term management of the VMECs.

NASH HOLLAND DEVELOPMENT (Continued) **S121476010**

Street site redevelopment project will be from lot line to lot line across the property and consist of six levels of parking, one below grade and five above grade, with retail and office space fronting Webster Street on the ground and fourth floor, respectively. Above the sixth parking level is the amenities level containing a fitness center, party room, media center, conference rooms, lounge, and three residential units. Above the amenities level are eighteen floors of residential living spaces in different configurations (e.g., two-bedroom, one-bedroom, or studio apartments). Above the last residential level is a skylounge area with an upper and lower roof terrace, skylounge, and pool. A portion of this level also houses part of the mechanical roof deck. The top level houses more of the mechanical roof deck as well as the elevator mechanical control room. The Site comprises two separate lots that are currently developed from lot line to lot line. The southern portion of the property has been assigned Alameda County Assessors Parcel Number (APN): 008-0624-7, and the northern parcel is 008-0624-6. Existing site improvements include two slab on-grade buildings constructed in 1930. The southern half is two stories fronting Webster Street and a single story beyond that. The northern portion is two stories. The buildings are constructed of cinder block and brick walls and have wooden trusses supporting wooden roofing systems. The southern portion of the property is occupied by a 14,000-square foot structure that was mainly used for vehicle parking and was owned and operated by Douglas Parking Company. Former retail/commercial spaces along Webster Street frontage of the building included Coloso Coffee, Pablo Brady Hair Salon, RAWR (cat food), and Amanda Kate Hill (AKH) Fitness and Nutrition. Above the retail/commercial spaces along Webster Street frontage of the building were the offices of Douglas Parking Company.The northern portion of the property is occupied by a 7,500-square foot structure used mainly for vehicle parking though there is some storage space on the ground floor. Historical research documented that the subject property parcels were developed with a residence and a nursery including a greenhouse in the late 1800s, residences in the early 1900s, and by the 1930s with buildings in the approximate configuration of the present day. Vehicle parking and a variety of automotive service operations including painting and auto repairing were present in at least the 1950s and 1960s, and through the present other operations including restaurants, pet food sales, a hair salon and a fitness center.

Latitude:	37.8060966615025
Longitude:	-122.267333865166
Status:	Completed - Case Closed
Status Date:	05/10/2018
Case Worker:	KLD
RB Case Number:	01-0151
Local Agency:	ALAMEDA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0000129
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Naphthalene, Toluene, Xylene
Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. Additional documents can be viewed over the Internet on Alameda County Department of Environmental Health website (http://www.acgov.org/aceh/lop/ust.htm). Both databases should be reviewed to obtain a complete history. Please refer to the Case Closure Summary Form dated May 10, 2018 and the case file found on both Alameda County Department of Environmental Health website (http://www.acgov.org/aceh/lop/ust.htm) and on GeoTracker. Leaking Underground Storage Tank (LUST) Cleanup Site Case No. T0600100140/RO0000129 was opened in 1993 by ACDEH to investigate and evaluate impacts to human health and the environment associated with an unauthorized release from three USTs and associated UST system components that were removed from the site in 1992. Site investigation activities associated with the LUFT case were conducted from 1993 to 2017 to evaluate the extent of subsurface impacts to soil, soil vapor and groundwater from the UST system release. This UST release case has been evaluated for closure consistent with the State Water Resource Control Boards Low-Threat Underground Storage Tank Closure Policy (LTCP) for petroleum related contaminants. ACDEH has determined that the site meets all the LTCP General Criteria and Media Specific Criteria and thus the site poses a low threat to human

NASH-HOLLAND 1721 WEBSTER INVESTORS, LLC (Continued) **S101624488**

health and safety and to the environment under current and reasonably anticipated near-term future scenarios. Other potential chemicals of concern from historic land use and operations at the site were not evaluated in association with this LUST case. ACDEH recommends that during the environmental due diligence process (initiated as part of activities including, but not limited to, property transactions, bank refinancing, and redevelopment) that the site and parcels in the vicinity of the site be evaluated for risk from and exposure to potential chemicals of concern identified at this site. Please refer to the Case Closure Summary Form dated May 10, 2018 and the case file found on both Alameda County Department of Environmental Health website (http://www.acgov.org/aceh/lop/ust.htm) and on GeoTracker.

BUTTNER PROPERTY (Continued) **S112186515**

Case Worker:	KLD
RB Case Number:	Not reported
Local Agency:	ALAMEDA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0003100
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Lead, Benzene, Diesel, Ethylbenzene, Gasoline, Kerosene, MTBE / TBA / Other Fuel Oxygenates, Naphthalene, Stoddard solvent / Mineral Spriits / Distillates, Toluene, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History:	The site is currently occupied by a two-story commercial building built in 1969 which occupies the entire parcel. The former gasoline service station was demolished and cleared in 1966, but no records were on file with the Oakland Building Department, Alameda County Environmental Health Services Department or Oakland Fire Department regarding the number of USTs, removal of the USTs, and/or confirmation sampling of the USTs. In July 2011, three soil borings were advanced around the site building. Concentrations up to, 59,000 parts per billion (ppb) Total Petroleum Hydrocarbons as gasoline (TPHg) and 200,000 ppb Total Petroleum Hydrocarbons as diesel (TPHd) were documented in grab groundwater samples. These concentrations indicate an unauthorized release has occurred from the UST(s) at the site and this Leaking Underground Fuel Tank (LUFT) case was opened to investigate the release. Environmental investigations have occurred from 2011 through 2017 and have included installation of four soil vapor points and the collection of soil, groundwater and soil gas samples. This LUST case was evaluated for closure consistent with the State Water Resource Control Boards Low-Threat Underground Storage Tank Closure Policy (LTCP) for petroleum-related contaminants. ACDEH has determined that the site meets the LTCP General Criteria and Media Specific Criteria for Groundwater and Vapor Intrusion but not Media Specific Criteria for Direct Contact and Outdoor Air. Although PAHs were not detected at/above the laboratory detection levels used by the laboratory in soil samples taken within the 0 to 5 foot depth interval in the building footprint, the laboratory detection levels used by the laboratory exceeded the Table 1 concentrations for residential and commercial/industrial worker exposure current maximum concentrations of PAHs as benzo(a)pyrene toxicity equivalent (BaPe). ACDEH has determined that there is low potential for direct contact exposure because of the current land use as a commercial building resulting in a low potential for direct contact exposure to shallow soil beneath the building footprint. Therefore, the site poses a low risk to human health and safety and the environment. The determination was based on receptors and environmental conditions identified at and in the vicinity of the site at the time of closure and reasonably anticipated near-term future scenarios. Therefore, case closure is granted for the current commercial land use as a two-story commercial building. If a change in land use to any residential, commercial other than as a two story commercial building, or conservative land use, or if any site redevelopment is planned, Alameda County Department of Environmental Health (ACDEH) must be notified as required by Government Code Section 65850.2.2. Any below grade work require planning and implementation of appropriate health and safety procedures by the responsible party prior to and during excavation and construction activities.

RB Case Number:	NA
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Under Investigation
Potential Contaminants of Concern:	Not reported
Site History:	In 1993 a proposed redevelopment project consisting of an open air multi-story parking structure at 1750 Webster Street prompted a Phase II investigation that identified contamination at the site. Subsequently, a case was opened and subsurface investigations were conducted at the site including installation of three groundwater monitoring wells (A-1, A-2 and A-3). Based on data collected during soil and groundwater investigations and a 1998 Risk-Based Corrective Action ACDEH and the Regional Water Board determined that contamination detected on the site appeared to be related to an up-gradient source and did not pose a risk to human health under the

PARKING LOT (Continued) **S108246040**

proposed redevelopment scenario or under the existing land use as an at-grade parking lot. In a letter dated February 9, 2000, ACDEH required recordation of a deed restriction for the site to ensure that the site was re-evaluated if the proposed development changed to include enclosed structures and directed that the three monitoring wells not be destroyed so the responsible party for the groundwater contaminant plume beneath the property could use the wells for future monitoring. The proposed open air parking structure failed to materialize and the site remained as an at-grade parking lot until 2017 when a new residential project was proposed. In 2017, Site Cleanup Program Case No. RO0002672 was administratively closed and the three groundwater monitoring wells transferred to a new Site Cleanup Program Case No. RO0003229 for the Lennar Multifamily Communities redevelopment project.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Lead Agency:	ALAMEDA COUNTY LOP
Lead Agency Case Number:	RO0003417
Latitude:	37.8045
Longitude:	-122.26773
Case Type:	Cleanup Program Site
Case Worker:	DY
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Benzene, Ethylbenzene, Toluene, Xylene
Site History:	Site Cleanup Program Case No. RO0003417 was opened by Alameda County Department of Environmental Health (ACDEH) in February 2020 to provide regulatory oversight of the investigation and cleanup of subsurface contamination at the Site to facilitate redevelopment by 1510 Webster Street GP LLC. The Site is located in a mixed residential and commercial area of downtown Oakland and consists of two rectangular parcels (Alameda County Assessor Parcel Numbers (APN) 8-625-34-1 and 8-625-32 totaling approximately 0.33-acres located at the northeast corner of the intersection between Webster Street and 15th Street. The current configuration of the Site includes a large Warehouse/office building located at 1510 Webster St. (APN 8-625-34-1) and a smaller warehouse located at 344 15th Street (APN 8-625-32). Both buildings are currently unoccupied. There is a one-level basement which is approximately 10 feet below existing street grade at the uilding located at 1510 Webster Street. Conceptual redevelopment plans include the construction of a 3 to 4 story commercial/office building with ground floor retail/restaurants. Future development may consists of residential units above the commercial/office space. The subterranean floor is also conceptually planned. The Site is accessed via Webster Street to the west and 15th Street to the south and is bound to the north by a coffee roasters; to the east by a public parking lot and retail/office spaces; to the south by office spaces and 15th Street, followed by a mixed-use office/retail building; to the west by office buildings; and to the southwest by an office building across the intersection of Webster Street and 15th Street. Review of available Sanborn Fire Maps identify the Site as consisting of dwellings from 1887 until at least 1911. An auto repair building was observed from around 1925 through 1943, as well as a restaurant from the 1930s until 1943. In the early 1950s, the current larger building was built and occupied by offices through the 1980s. A knitting company operated at the Site from approximately 1992 to 2015. The smaller parcel became a parking lot from at least 1950 through 1993. In 1995,

the newer/smaller building was built and occupied by various offices up to mid 2010s. Subsurface investigations were conducted in May and June 2019 and included the collection of soil, grab-groundwater, soil gas, and sub-slab vapor samples to evaluate potential subsurface impacts and vapor intrusion concerns. Soil and grab groundwater were collected from three borings (SB-1 through SB-3). Soil samples were collected from 5 feet below the building floor slab and analyzed for volatile organic compounds (VOCs) by U.S. Environmental Protection Agency (EPA) Method 8260B. One sample was analyzed for Title 22 Metals. Grab groundwater collected from first encountered groundwater using temporary slotted PVC casing and analyzed for VOCs by EPA Method 8260B and gasoline-, diesel-, and motor-oil-range total petroleum hydrocarbons (TPHg/d/mo) by EPA Method 8015. Soil results indicate VOCs were detected including tetrachloroethene (PCE) and methyl- ethyl- ketone (MEK) with concentrations up to 0.00166 milligrams per kilogram (mg/kg) and 0.0404 mg/kg, respectively. Grab-groundwater was only collected from two locations and detected PCE concentrations up to 8.8 micrograms per liter (ug/L). Three temporary soil gas locations (SG-1 through SG-3) were advanced to a depth of 5 feet bgs and analyzed for VOCs including isopropyl alcohol (IPA) by EPA Method TO-15. Analytical results indicated PCE at concentrations ranging from 21 to 230 micrograms per cubic meter (a%g/m3) were detected in the soil gas probes. Additionally, benzene, toluene, and ethylbenzene was also detected in the soil gas probes. Five sub-slab vapor pins was advanced inside the building located at 1510 Webster Street only. PCE, trichloroethene (TCE), and benzene were detected above applicable regulatory environmental screening levels in all locations for residential and commercial land use. Additional subsurface investigations in all media are warranted to evaluate data gaps, possible remediation of discovered VOCs, engineering controls (e.g., vapor intrusion mitigation system) and institutional controls (e.g., land use covenant). Prior to occupancy, indoor air sampling for PCE, TCE, and benzene would likely be required to evaluate potential vapor intrusion risk and to comply with regulatory residential screening levels.

BURKE PROPERTY (Continued) **S121476142**

RB Case Number: 01S0821
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Gasoline
Site History: In June 2000, a Phase I Environmental Site Assessment was performed for the site, which identified site uses as a former dry cleaner as well as an auto repair which had operated three USTs. Between 2002 to 2005, subsurface investigations, consisting of soil boring and monitoring well installations, were conducted at the site. Groundwater concentrations of up to 140,000 micrograms per liter TPHg, 380 ug/LTPHd, 810 ug/L benzene, 550 ug/L cis-dichloroethene (c-1,2-DCE), and 60 ug/L vinyl chloride (VC). The lateral and vertical extent of soil and groundwater contamination is undefined and appears to extend off site. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site may be located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. 9/7/17: Barbara Sieminski requested that this case status be changed to Non-case based on limited and inconsistent information. Barbara Sieminski will verify that the electronic record is consistent with her files. LMM.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 03/06/2014
Comments: Work Notice of Negherbon Soil Excavation and Removal Work to Begin March 17, 2014. DTSC will oversee this work to ensure that the activities take place in accordance with the DTSC-approved Response Plan and Implementation Plan dated June 2013 and October 2013, respectively.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 11/14/2013
Comments: Final Implementation Plan dated November 2013, approved by DTSC letter dated November 14, 2013. The objectives of the plan are to (1) describe elements of the response actions, and (2) provide details of the work to be conducted. The plan includes detailed plans as appendices that describe procedures required to implement the proposed response actions: Excavation and Backfill Plan, Transportation plan, Decontamination Plan, Air Monitoring Plan, Health and Safety Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 01/23/2013
Comments: Workplan which identifies locations of samples to be collected for CPT, soil, shallow and deep gw and chemical analyses which will be conducted. Sampling revisions approved on 1/30/2013, see revised figure 10

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 06/06/2013
Comments: Community Profile dated April 2013, describes the community and potential community concerns regarding the potential health risks associated with the development of the Negherbon Project Site and the anticipated public participation activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Plan
Completed Date: 03/04/2015
Comments: Operation and maintenance plan for groundwater monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Workplan
Completed Date: 10/14/2013
Comments: Request to Destroy Monitoring Wells at the Negherbon Property, dated October 11, 2013, approved by DTSC email dated October 14, 2013. Request includes tables/figures/attachments, Groundwater Monitoring Well Construction Details, Groundwater Monitoring Well Locations, and

Monitoring Well Construction Logs. Well abandonment activities will be conducted in accordance with Alameda County Department of Public Works Agency (ACPWA) Well Standards Program requirements and any specific conditions of the ACPWA permit. A well closure report will be submitted to DTSC within 30 days of abandonment of each well. The report(s) will include copies of the well completion reports for the destroyed wells that are sent to the State of California Department of Water Resources.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: AB 389 Response Plan
Completed Date: 07/24/2013
Comments: Some soil excavation followed with GW monitoring and LUC for a portion of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 06/13/2013
Comments: Community Notice dated June 2013, entitled Negherbon Project Draft Response Plan Available for Review and Comment. DTSC invites the public to review and comment on the draft Response Plan (Remedial Action Plan) and proposed Notice of Exemption for the Negherbon Site. The fact sheet provides a Site history, summary of the proposed cleanup, and opportunities for public involvement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 06/13/2013
Comments: Public Notice dated June 2013, entitled Draft Response Plan for Negherbon Project. DTSC invites the public to comment on a Draft Response Plan for the Negherbon Project. Public Notice indicates Public Comment Period, June 18 through July 19, 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 01/23/2013
Comments: Work Notice of Site Assessment Work at Negherbon, Oakland, CA. Work will begin January 31, 2013. Sampling results will be compiled into a report and reviewed by DTSC who will oversee the investigation to ensure that the activities are in accordance with the DTSC approved Site Assessment Workplan dated January 23, 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 05/11/2016
Comments: The California Department of Toxic Substances Control (DTSC) and Hive Development Group, LLC, a California limited liability company (Proponent) enter into this Operation and Maintenance Agreement (Agreement) for the site located at 2333 Broadway and 421 24th Street, Oakland, Alameda County, California (Site). A DTSC-approved remedy has been installed at the Site for the remediation of groundwater. The remedy consists of groundwater monitoring, a land use covenant restricting the use of Environmental Area 1 for sensitive uses without further DTSC review, and restricting the use of groundwater. The Site is owned by Hive Development Group, LLC. A site location map and the assessor's parcel map are attached as Exhibit A and Exhibit B. A site map or diagram showing the location(s) of the installed remedy (groundwater monitoring wells) is attached as Exhibit C. Proponent shall fully implement the DTSC-approved Operation and Maintenance Plan dated February 2015, including any requirements for inspections, monitoring, reporting and record keeping as approved by DTSC on March 4, 2015 or any successor O&M Plan as later approved by DTSC.

Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/28/2013
Comments: Letter dated March 27, 2013, notifying agencies of DTSC's intent to enter into an agreement under the California Land Reuse and Revitalization Act of 2004 (CLRRA) with the Hive Development Group, LLC, for the property located at 2345 and 2333 Broadway and 421 24th Street in Oakland, Alameda County, California. Entry into this agreement provides Hive Development Group, LLC with immunity from liability for certain hazardous materials response costs and damage claims. Under the agreement, Hive Development Group, LLC will perform a site assessment and prepare and implement a response plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 01/30/2018
Comments: Revised Proposed Termination of Groundwater Monitoring at the former Negherbon Site, Oakland CA (dated 25 January 2018). This memorandum provides information and analysis to support a recommendation for cessation of further groundwater monitoring on the Site. Site data demonstrate there are no identified soil or soil vapor sources of 1,1-DCA on the Site. The 1,1-DCA plume is migrating onto the Site from an upgradient source. The 1,1-DCA plume on the Site is stable. DTSC has no additional comments and hereby approves the request to terminate groundwater monitoring. As a reminder, the Operation and Maintenance Agreement signed with Hive Development Group, LLC remains in effect. The Operation and Maintenance Agreement requires implementation of the Operation and Maintenance Plan. The Operation and Maintenance Plan covers installation and sampling of groundwater monitoring wells. Groundwater monitoring wells that are not being regularly sampled can serve as a conduit for contamination migration.

Therefore, it may be prudent to properly abandon these wells. Following receipt of documentation that the monitoring wells have been properly abandoned, DTSC will initiate steps to terminate the Operation and Maintenance Agreement. This includes conducting an annual inspection and submitting an annual inspection report to DTSC by January 15th of each calendar year.

Completed Date: 10/04/2016
Comments: Quarterly Groundwater Monitoring for July 2016. The data collected during July and December 2015 and April and July 2016 indicate: TPH has not been reported in groundwater collected from HMW-1, HMW-2, or HMW-3. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are similar to or lower than those detected during the previous sampling events. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are generally stable; concentrations do not appear to be increasing. Based on the data collected during the first three quarterly events, it is anticipated the COC evaluation will be provided in early 2017, after the sixth quarterly event. The next quarterly groundwater monitoring will be performed during October 2016. The DTSC will be notified regarding the exact date approximately 7 days prior to the monitoring event.

Completed Area Name: PROJECT WIDE

Completed Document Type: Operation and Maintenance Report
Completed Date: 06/27/2016
Comments: Quarterly Groundwater Monitoring for April 2016. VOCs were detected above reporting limits in samples from monitoring wells HMW-1 and HMW-2 (including the blind duplicate sample from HMW-3). Detected VOCs include 1,1-DCA, 1,1-DCE, 1,2-DCA, 1,1,2-TCA, TCE, and VC. These VOCs were reported at concentrations similar to those reported in samples collected during the first quarter event and the Response Plan. TPH was not detected in groundwater samples. Groundwater levels measured in April were 1.74 to 1.86 feet higher than levels measured in July 2015, reflecting autumn and winter rain. The data collected during July and December 2015 and April 2016 indicate: TPH has not been reported in groundwater collected from HMW-1, HMW-2, or HMW-3. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are generally lower than in groundwater collected during the previous investigation. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are generally stable; concentrations do not appear to

NEGHERBON (Continued) **S112241534**

be increasing. Redox conditions are suitable for dechlorination of 1,1-DCA. As described in the DTSC approved O&M Plan, after 6 quarters of monitoring an evaluation of COCs in groundwater will be prepared and if appropriate, cessation of further groundwater monitoring events will be recommended. Based on the data collected during the first three quarterly events, it is anticipated the COC evaluation will be provided in early 2017, after the sixth quarterly event. The next quarterly groundwater monitoring will be performed during July 2016. DTSC will be notified regarding the exact date 7 days prior to the monitoring event.

Completed Date: 03/22/2017
Comments: Quarterly Groundwater Monitoring for October 2016. The data collected during the five quarters of sampling indicate: TPH has not been reported in groundwater collected from HMW-1, HMW-2, or HMW-3. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are similar to or lower than those detected during the previous sampling events. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are generally stable; concentrations do not appear to be increasing. However, The 10/18/2016 sample from HMW-2 shows a slight increase and the highest concentration of 1,1-DCA among the past five (5) quarterly monitoring events. As described in the DTSC approved O&M Plan (EKI, 2015a), after 6 quarters of monitoring an evaluation of COCs in groundwater will be prepared and if appropriate, cessation of further groundwater monitoring events will be recommended. Based on the data collected during the five quarterly events, it is anticipated the COC evaluation will be provided in early 2017, after the sixth quarterly event. The next quarterly groundwater monitoring will be performed during January 2017. The DTSC will be notified regarding the exact date approximately 7 days prior to the monitoring event.

NEGHERBON (Continued) **S112241534**

Completed Date: 06/16/2017
Comments: Quarterly Groundwater Monitoring for February 2017, dated May 31, 2017. The data collected during the six quarters of sampling indicate: TPH has not been reported in groundwater collected from HMW-1, HMW-2, or HMW-3. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are lower than those detected during the pre-remedial Site investigation. The 1,1-DCA concentration measured in HMW-1 was lower in February compared to previous O&M sampling events. The 1,1-DCA concentration measured in HMW-2 was higher in February compared to previous O&M sampling events. The DTSC approved O&M Plan (EKI, 2015a) noted that an evaluation of COCs in groundwater would be prepared after 6 quarters of groundwater monitoring and if appropriate, cessation of further groundwater monitoring events could be recommended. Uptown will prepare the evaluation of COCs in groundwater and transmit the evaluation to the DTSC by 30 June 2017.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 12/15/2015
Comments: Well Installation Report and Quarterly Groundwater Monitoring Report for July 2015, dated November 6, 2015. The report presents data related to the installation, development, and sampling of three monitoring wells in accordance with the Operation and Maintenance (O&M) Plan for groundwater (EKI, February 2015). Sampling results for the first round of groundwater monitoring, collected in July 2015, are included in the report. Contaminant levels in groundwater monitoring wells are consistent with historical levels in groundwater beneath the site. In addition to 1,1,1-dicloroethane (1,1-DCA), trichloroethene, vinyl chloride, 1,1-dicloroethene, 1,2-dichloroethane, and 1,1,2-trichloroethane were detected above their respective maximum contaminant levels in the newly constructed upgradient well; however, a remedial goal has only been established for 1,1-DCA per the Response Plan (EKI, June 2013). Per the O&M Plan, additional data from the newly-installed monitoring wells will be obtained quarterly to evaluate the contaminant trends over time and the evidence for natural attenuation. Report approved by DTSC letter dated December 15, 2015.

Completed Area Name: PROJECT WIDE

Elevation | Site | Database(s) | EDR ID Number | EPA ID Number

NEGHERBON (Continued) **S112241534**

Response Plan (see Appendix A). TPH was not detected in groundwater samples. Groundwater elevations measured in July and December 2015 are included in Table 2. As shown, groundwater levels measured in December were 0.71 to 1.19 feet higher than levels measured in July 2015, reflecting autumn rain. Concentrations of 1,1-DCA were higher in samples collected during December than concentrations collected during July 2015. However, because there have been only two sampling events, there are insufficient data to evaluate the natural attenuation of 1,1-DCA. The next quarterly groundwater monitoring will be performed during April 2016. The DTSC will be notified regarding the exact date 7 days prior to the monitoring event.

Completed Document Type: Well Decommissioning Workplan
Completed Date: 10/14/2013
Comments: Request to Destroy Monitoring Wells at the Negherbon Property, dated October 11, 2013, approved by DTSC email dated October 14, 2013. Request includes tables/figures/attachments, Groundwater Monitoring Well Construction Details, Groundwater Monitoring Well Locations, and Monitoring Well Construction Logs. Well abandonment activities will be conducted in accordance with Alameda County Department of Public Works Agency (ACPWA) Well Standards Program requirements and any specific conditions of the ACPWA permit. A well closure report will be submitted to DTSC within 30 days of abandonment of each well. The report(s) will include copies of the well completion reports for the destroyed wells that are sent to the State of California Department of Water Resources.

Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 05/11/2016
Comments: The California Department of Toxic Substances Control (DTSC) and Hive Development Group, LLC, a California limited liability company (Proponent) enter into this Operation and Maintenance Agreement (Agreement) for the site located at 2333 Broadway and 421 24th Street, Oakland, Alameda County, California (Site). A DTSC-approved remedy has been installed at the Site for the remediation of groundwater. The remedy consists of groundwater monitoring, a land use covenant restricting the use of Environmental Area 1 for sensitive uses without further DTSC review, and restricting the use of groundwater. The Site is owned by Hive Development Group, LLC. A site location map and the assessor's parcel map are attached as Exhibit A and Exhibit B. A site map or diagram showing the location(s) of the installed remedy (groundwater monitoring wells) is attached as Exhibit C. Proponent shall fully implement the DTSC-approved Operation and Maintenance Plan dated February 2015, including any requirements for inspections, monitoring, reporting and record keeping as approved by DTSC on March 4, 2015 or any successor O&M Plan as later approved by DTSC.

demonstrate there are no identified soil or soil vapor sources of 1,1-DCA on the Site. The 1,1-DCA plume is migrating onto the Site from an upgradient source. The 1,1-DCA plume on the Site is stable. DTSC has no additional comments and hereby approves the request to terminate groundwater monitoring. As a reminder, the Operation and Maintenance Agreement signed with Hive Development Group, LLC remains in effect. The Operation and Maintenance Agreement requires implementation of the Operation and Maintenance Plan. The Operation and Maintenance Plan covers installation and sampling of groundwater monitoring wells. Groundwater monitoring wells that are not being regularly sampled can serve as a conduit for contamination migration. Therefore, it may be prudent to properly abandon these wells. Following receipt of documentation that the monitoring wells have been properly abandoned, DTSC will initiate steps to terminate the Operation and Maintenance Agreement. This includes conducting an annual inspection and submitting an annual inspection report to DTSC by January 15th of each calendar year.

Completed Document Type: Operation and Maintenance Report
Completed Date: 10/04/2016
Comments: Quarterly Groundwater Monitoring for July 2016. The data collected during July and December 2015 and April and July 2016 indicate: TPH has not been reported in groundwater collected from HMW-1, HMW-2, or HMW-3. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are similar to or lower than those detected during the previous sampling events. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are generally stable; concentrations do not appear to be increasing. Based on the data collected during the first three quarterly events, it is anticipated the COC evaluation will be provided in early 2017, after the sixth quarterly event. The next quarterly groundwater monitoring will be performed during October 2016. The DTSC will be notified regarding the exact date approximately 7 days prior to the monitoring event.

Comments: Quarterly Groundwater Monitoring for April 2016. VOCs were detected above reporting limits in samples from monitoring wells HMW-1 and HMW-2 (including the blind duplicate sample from HMW-3). Detected VOCs include 1,1-DCA, 1,1-DCE, 1,2-DCA, 1,1,2-TCA, TCE, and VC. These

NEGHERBON (Continued) **S112241534**

VOCs were reported at concentrations similar to those reported in samples collected during the first quarter event and the Response Plan. TPH was not detected in groundwater samples. Groundwater levels measured in April were 1.74 to 1.86 feet higher than levels measured in July 2015, reflecting autumn and winter rain. The data collected during July and December 2015 and April 2016 indicate: TPH has not been reported in groundwater collected from HMW-1, HMW-2, or HMW-3. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are generally lower than in groundwater collected during the previous investigation. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are generally stable; concentrations do not appear to be increasing. Redox conditions are suitable for dechlorination of 1,1-DCA. As described in the DTSC approved O&M Plan, after 6 quarters of monitoring an evaluation of COCs in groundwater will be prepared and if appropriate, cessation of further groundwater monitoring events will be recommended. Based on the data collected during the first three quarterly events, it is anticipated the COC evaluation will be provided in early 2017, after the sixth quarterly event. The next quarterly groundwater monitoring will be performed during July 2016. DTSC will be notified regarding the exact date 7 days prior to the monitoring event.

Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 03/22/2017
Comments: Quarterly Groundwater Monitoring for October 2016. The data collected during the five quarters of sampling indicate: TPH has not been reported in groundwater collected from HMW-1, HMW-2, or HMW-3. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are similar to or lower than those detected during the previous sampling events. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are generally stable; concentrations do not appear to be increasing. However, The 10/18/2016 sample from HMW-2 shows a slight increase and the highest concentration of 1,1-DCA among the past five (5) quarterly monitoring events. As described in the DTSC approved O&M Plan (EKI, 2015a), after 6 quarters of monitoring an evaluation of COCs in groundwater will be prepared and if appropriate, cessation of further groundwater monitoring events will be recommended. Based on the data collected during the five quarterly events, it is anticipated the COC evaluation will be provided in early 2017, after the sixth quarterly event. The next quarterly groundwater monitoring will be performed during January 2017. The DTSC will be notified regarding the exact date approximately 7 days prior to the monitoring event.

Completed Date:	06/16/2017
Comments:	Quarterly Groundwater Monitoring for February 2017, dated May 31, 2017. The data collected during the six quarters of sampling indicate: TPH has not been reported in groundwater collected from HMW-1, HMW-2, or HMW-3. 1,1-DCA concentrations in groundwater collected from HMW-1 and HMW-2 are lower than those detected during the pre-remedial Site investigation. The 1,1-DCA concentration measured in HMW-1 was lower in February compared to previous O&M sampling events. The 1,1-DCA concentration measured in HMW-2 was higher in February compared to previous O&M sampling events. The DTSC approved O&M Plan (EKI, 2015a) noted that an evaluation of COCs in groundwater would be prepared after 6 quarters of groundwater monitoring and if appropriate, cessation of further groundwater monitoring events could be recommended. Uptown will prepare the evaluation of COCs in groundwater and transmit the evaluation to the DTSC by 30 June 2017.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 12/15/2015
Comments: Well Installation Report and Quarterly Groundwater Monitoring Report for July 2015, dated November 6, 2015. The report presents data related to the installation, development, and sampling of three monitoring wells in accordance with the Operation and Maintenance (O&M) Plan for groundwater (EKI, February 2015). Sampling results for the first round of groundwater monitoring, collected in July 2015, are included in the report. Contaminant levels in groundwater monitoring wells are consistent with historical levels in groundwater beneath the site. In addition to 1,1,1-dicloroethane (1,1-DCA), trichloroethene, vinyl chloride, 1,1-dicloroethene, 1,2-dichloroethane, and 1,1,2-trichloroethane were detected above their respective maximum contaminant levels in the newly constructed upgradient well; however, a remedial goal has only been established for 1,1-DCA per the Response Plan (EKI, June 2013). Per the O&M Plan, additional data from the newly-installed monitoring wells will be obtained quarterly to evaluate the contaminant trends over time and the evidence for natural attenuation. Report approved by DTSC letter dated December 15, 2015.

NEGHERBON (Continued) **S112241534**

Comments: Quarterly Groundwater Monitoring for December 2015, dated February 10, 2016. Approved by DTSC letter, dated February 23, 2016. Analytical results for groundwater samples from the three wells are summarized in Table 3. The analytical lab reports and chain-of-custody are included in Appendix C. VOCs were detected above reporting limits in samples from monitoring wells HMW-1 and HMW-2 (including the blind duplicate sample from HMW-3). Detected VOCs include 1,1-DCA, 1,1-DCE, 1,2-DCA, 1,1,2-TCA, TCE, and VC. These VOCs were reported at concentrations similar to those reported in samples collected during the first quarter event (see Table 3) and the Response Plan (see Appendix A). TPH was not detected in groundwater samples. Groundwater elevations measured in July and December 2015 are included in Table 2. As shown, groundwater levels measured in December were 0.71 to 1.19 feet higher than levels measured in July 2015, reflecting autumn rain. Concentrations of 1,1-DCA were higher in samples collected during December than concentrations collected during July 2015. However, because there have been only two sampling events, there are insufficient data to evaluate the natural attenuation of 1,1-DCA. The next quarterly groundwater monitoring will be performed during April 2016. The DTSC will be notified regarding the exact date 7 days prior to the monitoring event.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Gasoline, Naphthalene, Polynuclear aromatic hydrocarbons (PAHs), Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating
Site History:	The subject site has recently been purchased and proposed to under go a change in land use from commercial / industrial to residential. This environmental case was opened in order to evaluate the appropriateness of the land use change with respect to residual contamination. Not all historic documents for the case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Threat to Water Quality:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Treat To Water:	Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity:	Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the

CHEVRON (Continued) **S110060468**

Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. The subject site was used as a service station until 1972 when the site was demolished and the tanks removed. The station building, two dispenser islands, one waste oil UST, and two gasoline USTs were removed. An earlier generation of USTs had previously been removed. Since 1975 it has been used as a parking lot. A soil vapor survey was conducted in 1988 to determine if the site had been impacted, three wells were installed in October 1988, four wells were installed in 1989, four wells were installed offsite in June 1990, two offsite wells were installed in October 1991, and another two wells were installed offsite in late 1992, for a total of 16 wells. Limited soil excavation was conducted in January 1992. An SVE system operated onsite in 1993, but showed minimal effectiveness. In June 2004 the first generation UST pit was investigated and impacts were discovered. In April 2007 four bores were installed to investigate the extent of contamination associated with the first generation USTs. In June 2007 a vapor survey was conducted and elevated concentrations were detected in all vapor points. In early 2008 105 bucket auger bores were installed to remove impacted soil associated with the first generation USTs. A report on the installation of a post-remediation groundwater monitoring well and the installation of several soil bores to infill a data gap in the downgradient extent of the groundwater plume was generated. Well MW-17 was installed in October 2010. Additional excavation of soil impacted by the second generation USTs and the waste oil UST was conducted between January and June 2011 as part of the redevelopment project for the subject site.

RB Case Number:	01-1313
Local Agency:	ALAMEDA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0002600
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel, Gasoline, Stoddard solvent / Mineral Spriits / Distillates
Site History:	Not all historic documents for the fuel leak case may be available on Geotracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://www.acgov.org/aceh/lop/ust.htm This site is to be entered into the City of Oakland Permit Tracking System due to the residual contamination on site. The subject site is currently in mixed commercial/residential use and is comprised of two parcels, APN 9-682-1-1 and 9-682-1-2. Parcel APN 9-682-1-2 is located at 2633 Telegraph Avenue and is occupied by the three-story former Sears retail center including a basement. The retail center was built in 1930 and an approved December 1940 building permit indicated the possible addition of a tire and oil shop on the west side of the retail center. The ground floor is currently in commercial use and the upper floors are in residential use. APN 9-682-1-1 is the site of the former above ground parking structure for the Sears retail center built in the early 1960s and is currently not in use. Lake Merritt, the closest surface water body, is located approximately 2,700 feet southeast of the property. The direction of groundwater flow in the area appears to be towards the south-southeast. This fuel leak case has been evaluated for closure consistent with the State Water Resource Control Board Low-Threat Underground Storage Tank Closure Policy (LTCP). The case meets all the general and media-specific criteria of the LTCP. Analyses for polyaromatic hydrocarbons (PAHs) in soil are not required due to the absence of a waste oil UST at the site. No soil samples collected from depths less than five feet below ground surface were analyzed for naphthalene but the maximum soil concentration of diesel found at the site in the vicinity of the tire and oil shop, an expected source area, was reported to be 1,900 milligrams per kilogram (mg/kg) at a depth of 11 feet below grade surface (bgs). The LUFT manual indicates that naphthalene is present at an average of 0.26% and a maximum of 0.8% in fresh diesel product. This indicates that naphthalene may be present at an average concentration up to 4.94 mg/kg in this sample, which is below the Table 1 criteria for a residential or commercial facility. ACEH has

SEARS AUTO CENTER # 1058 (Continued) **S103647715**

made the determination that there is low potential for direct contact exposure because of the current land use as a mixed commercial/residential building and the entire site is paved. Due to residual contamination at the site, the site is closed as a commercial site with site management requirements. If there is a proposed change in land use to any residential, or conservative land use, or if any redevelopment occurs, Alameda County Environmental health (ACEH) must be notified as required by Government Code Section 65850.2.2. ACEH will re-evaluate the site relative to the proposed redevelopment. Excavation or construction activities in areas of residual contamination require planning and implementation of appropriate health and safety procedures by the responsible party prior to and during excavation and construction activities.

Polynuclear aromatic hydrocarbons (PAHs), Toluene, Xylene

Site History: In 2019, ACDEH opened this Site Cleanup Case (RO0003379) and entered into a Voluntary Remedial Action Agreement with City Ventures Homebuilding, LLC, (City Ventures) to review site conditions on eight parcels (APNs 5-431-11, 5-431-12, 5-431-24, 5-431-25, 5-431-26, 5-431-27, 5-431-28, 5-431-03) in Oakland and evaluate a change in land use to multi-unit residential housing. Environmental oversight was initially conducted under SCP Case No. RO0003157 which was opened by ACDEH in 2015 associated with redevelopment by City Ventures of two project areas referred to as the "West Grand Block" and the "Market Street Block". In 2019, this case (SCP Case No. RO0003379) was opened for the Market Street Block redevelopment project to facilitate phased redevelopment of the two projects by City Ventures.

Case Worker:	DR
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Ethylbenzene, Total Petroleum Hydrocarbons (TPH)
Site History:	Historic on-site operations include automotive repair and retail restaurants. Tetrachloroethene has been identified in soil vapor at the Site at concentrations up to 8,600 ug/m3. Carbon tetrachloride has also been identified in soil gas at a maximum concentration of 105 ug/m3. The source of these vapor phase contaminants of concern has not yet been identified and there are several data gaps in the existing data set which have not yet been evaluated. ACDEH has requested submittal of a Work Plan to evaluate the extents of contamination at the Site. In addition, ACDEH has requested indoor air sampling at the Site to evaluate vapor intrusion within the on-site automotive shop.

Local Case Number:	Not reported
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Benzene, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	On July 28, 1994, one 295-gallon waste-oil UST, one 575-gallon gasoline UST and two hydraulic lifts were removed from the site. Holes were observed in the gasoline UST upon removal. Maximum concentrations of 1,500 ppm TPHg, 1,800 ppm TPHd and 7.4 ppm benzene were detected in soil. Subsequently, a work plan was submitted but has not been implemented. Soil vapor and groundwater sampling must

CHRYSLER DEALERSHIP (Continued) **S103472330**

occur to evaluate the elevate benzene and extent of contamination in groundwater. On the Project Information screen, add this phrase to the Staff Notes and Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historical case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 02/01/2007
Comments: Investigation conducted by City of Oakland. Tetrachloroethylene (PCE) was detected om groundwater off-site above screening levels. DTSC did not oversee this investigation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 09/10/1993
Comments: Investigation conducted by Penn Environmental. Soil samples had tetrachlorethylene (PCE) up to 0.14 milligrams per kilogram (mg/kg) and trichloroethylene (TCE) up to 0.19 mg/kg. Groundwater had PCE up to 8100 micrograms per liter (ug/L) and chloroform up to 2.3 ug/L. The report concluded that there had been an on-site release of PCE impacting groundwater, with evidence of off-site migration. DTSC did not oversee the investigation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 08/04/1993
Comments: Investigation conducted by Penn Environmental. Limited soil sampling detected tetrachloroethylene (PCE) at concentrations up to 4.6 milligrams per kilogram (mg/kg). Report recommended further investigation of soil and groundwater. DTSC did not oversee this investigation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 08/13/2009
Comments: Tetrachloroethene (PCE) was detected in soil up to 330 milligrams per kilograms, in groundwater up to 53,000 microgram per liter and in soil gas up to 120,000 microgram per cubic meter inside the building. Additional sampling is proposed in the technical memorandum to close the data gaps.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 08/30/2002
Comments: Site Screening approved 8/30/08. Removal action recommended.

Completed Document Type:	Site Characterization Report
Completed Date:	02/01/2007
Comments:	Investigation conducted by City of Oakland. Tetrachloroethylene (PCE) was detected om groundwater off-site above screening levels. DTSC did not oversee this investigation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	09/10/1993
Comments:	Investigation conducted by Penn Environmental. Soil samples had tetrachlorethylene (PCE) up to 0.14 milligrams per kilogram (mg/kg) and trichloroethylene (TCE) up to 0.19 mg/kg. Groundwater had PCE up to 8100 micrograms per liter (ug/L) and chloroform up to 2.3 ug/L. The report concluded that there had been an on-site release of PCE impacting groundwater, with evidence of off-site migration. DTSC did not oversee the investigation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	08/04/1993
Comments:	Investigation conducted by Penn Environmental. Limited soil sampling detected tetrachloroethylene (PCE) at concentrations up to 4.6 milligrams per kilogram (mg/kg). Report recommended further investigation of soil and groundwater. DTSC did not oversee this investigation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	08/13/2009
Comments:	Tetrachloroethene (PCE) was detected in soil up to 330 milligrams per kilograms, in groundwater up to 53,000 microgram per liter and in soil gas up to 120,000 microgram per cubic meter inside the building. Additional sampling is proposed in the technical memorandum to close the data gaps.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	08/30/2002
Comments:	Site Screening approved 8/30/08. Removal action recommended.

Description: Harris Dry Cleaners (Site) is a former dry-cleaning facility located at the corner of 28th Street and Martin Luther King Jr. Way in a mixed commercial and residential area of Oakland. A two-story residential fourplex and three-story commercial and residential building are located on-site, along with a cinder block garage used

HARRIS DRY CLEANERS (Continued) **S113468742**

for parking. The buildings have been vacant and not maintained since about 1996. The City of Oakland has identified this property as a blighted property. Harris Dry Cleaners began operations sometime after 1951 in the commercial unit at the corner of 28th Street and Martin Luther King Jr. Way. In 1983, Harris Dry Cleaners ceased operation and Telegraph Cleaners continued operating the business as a dry cleaner. In 1991, the commercial units in the three-story building were occupied by Telegraph Cleaners, a laundromat called Washouse and a small retail store. Telegraph Cleaners moved to another location in 1996. Site investigations conducted on the property detected tetrachloroethene (PCE) as the primary contaminant in soil, soil gas, and groundwater. Other contaminants of concern (COCs) include trichloroethylene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE) in groundwater. In November 2011, an in situ chemical oxidation pilot study was conducted at the Site. Although some reduction in PCE concentrations in groundwater was observed, PCE concentrations rebounded to similar levels prior to the pilot study. In 2014 and 2020, groundwater sampling was conducted only on offsite monitoring wells. The onsite monitoring well was not sampled because the property owner did not provide access. The offsite well located immediately adjacent to the Site reported the highest concentrations of PCE and TCE on both sampling events. PCE concentrations increased from 2,100 g/L to 5,200 g/L and TCE concentration increased from 7 g/L to 9.4 g/L, respectively. DTSC is currently planning to conduct two rounds of groundwater monitoring of onsite and offsite monitoring wells and indoor air quality assessment. Indoor air sampling will occur on a voluntary basis at properties located on 663 - 687 28th Street and 2721 Martin Luther King Jr. Way. MC 05/2022

Completed Date: 12/30/2020
Comments: The Memo summarizes previous Site environmental investigations conducted in 2015, 2016, 2017, and results from soil, soil gas, and groundwater sampling that Roux conducted in 2020. Environmental investigations indicate that the following contaminants of potential concern (COPCs) are present at the Site above applicable DTSC Human and Ecological Risk Office Note 3 screening levels, United States Environmental Protection Agency Regional Screening Levels, and/or San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels: lead, benzo(a)pyrene, dibenzo(a,h)anthracene, total petroleum hydrocarbons as diesel (TPH-d), and TPH as motor oil (TPH-mo) in soil; 1,2-dichloroethane (1,2-DCA), and TPH-d in groundwater; and 1,2-DCA, benzene, chloroform, and trichloroethylene (TCE) in soil vapor. TCE is also found above the screening levels within 100-feet of distance from the property boundaries in groundwater. The memo outlines remediation activities that may be conducted to reduce risk to human health and the environment. Remediation activities and controls will likely include the following: soil excavation, importing clean fill, soil consolidation and stabilization, groundwater treatment and/or groundwater use restriction, vapor barrier, sub slab venting system and/or vapor

Completed Date:	05/14/2021
Comments:	Email sent to RP regarding missing activities on the CLRRA Agreement, Cost Estimate Sheet.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Technical Workplan
Completed Date:	12/30/2020
Comments:	The Memo summarizes previous Site environmental investigations conducted in 2015, 2016, 2017, and results from soil, soil gas, and groundwater sampling that Roux conducted in 2020. Environmental investigations indicate that the following contaminants of potential concern (COPCs) are present at the Site above applicable DTSC Human and Ecological Risk Office Note 3 screening levels, United States Environmental Protection Agency Regional Screening Levels, and/or San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels: lead, benzo(a)pyrene, dibenzo(a,h)anthracene, total petroleum hydrocarbons as diesel (TPH-d), and TPH as motor oil

(TPH-mo) in soil; 1,2-dichloroethane (1,2-DCA), and TPH-d in groundwater; and 1,2-DCA, benzene, chloroform, and trichloroethylene (TCE) in soil vapor. TCE is also found above the screening levels within 100-feet of distance from the property boundaries in groundwater. The memo outlines remediation activities that may be conducted to reduce risk to human health and the environment. Remediation activities and controls will likely include the following: soil excavation, importing clean fill, soil consolidation and stabilization, groundwater treatment and/or groundwater use restriction, vapor barrier, sub slab venting system and/or vapor mitigation system. An Operations and Maintenance plan will be required to ensure that the vapor barrier is effective, and a land use covenant may be necessary to ensure that all the environmental conditions at the site remain protective of human health and the environment.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	No Department of Defense Action Indicated (NDAI)
Completed Date:	06/30/2008
Comments:	DTSC did not concur with the Corps request for No Further Defense Action Indicated. The site has potential releases, and the DoD 2007 Report to Congress identifies significant funds for this site. Potential releases are from tanks and piping, maintenance activities, and solvents.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	06/28/2002
Comments:	PEA - PA/SI - Preliminary Assessment completed for U.S. EPA which found that no further action was needed at the site. Starting in 1998, the United States Environmental Protection Agency (US EPA) did an emergency removal of the hazardous substances. In October 1999, soil was removed in selected areas from 6 inches to 2 feet. There are no current operations at the site. Francis Plating used various plating solutions for aluminum anodizing, nickel and cadmium plating, and chromic acid passivation for stainless steel parts. Acids, bases, and dyes were used in the operation. Copper, lead, cadmium, nickel, cyanides, silver, zinc, sulfates, phosphates, chlorides, and soap solutions located in tanks and vats were some of the many chemicals used in the plating process. Some of these were located in a stainless steel containment tank 32 feet by 15 feet by 5 feet inside the building. There was a concrete pit area 15 feet by 68 feet by 3.5 feet outside in the "front yard" called the "Frog Pond". In the Front Yard along the 7th Street (east side) and along the fence next to the Shell Gas Station (north side) were limited areas of exposed soil. Most of the site was either paved, or had concrete or buildings on it. Francis Plating had a discharge permit and sent treated wastewater to the municipal sanitary system. East Bay Municipal Utility District (EBMUD) sealed the sanitary connection with concrete in the fourth quarter of 1996. Wastewater was then treated on-site. Wastewater, sent though the boiler to concentrate and precipitate the metals, was then fed into a filter press. The filter cake was spread out on the cement in the northern portion of the site and dried. There are no records of hazardous materials or waste removed from the site after 1993. After 1994, the property was used to store hazardous

material picked up by Earthco Environmental for disposal. The trailers located in the "Rear Yard" area were used. Starting in 1994, hazardous substances generated by operations on site were recycled back into the manufacturing process. US EPA led the cleanup after the fire in 1992. Some runoff from the fire reached the Oakland Estuary from storm drains in the area of the Howard Terminal. Much of the runoff was captured and contained and later disposed off site. The Regional Water Quality Control Board (RWQCB) sampled the water and sediments in the estuary for US EPA. In July 1999, eight surface composite samples were taken in the front yard and three in the rear yard area along Brush Street. In addition, there were 12 subsurface borings taken around the site and five waste sediment locations. The results ranged as follows: cadmium up to 2,100 milligarms per kilogram (mg/kg), lead up to 26,000 mg/kg, arsenic up to 26 mg/kg, and chromium up to 84,000 mg/kg. Based on the initial results, exposed soil to the depth of one-foot was removed along Brush Street and in the Front yard. After confirmation sampling, selected areas were excavated an additional six inches. After additional confirmation sampling, the site soil contained cadmium 0.7-7.5 mg/kg, lead 22-450 mg/kg, arsenic 1.2-7.4, and total chromium 13-300 mg/kg. Only one of the confirmation samples was above the residential cleanup levels for chromium and lead.

Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium VI
Site History: This case (RO0003174) is connected with Alameda County Department of Environmental Health Site Cleanup Case No. RO0002586 - Francis Plating Frog Pond (GeoTracker Global ID SL0600130797). The former plating facility operated from approximately 1957 to 1998. In 1998, the property was found to be abandoned with chemicals and equipment on site. As part of an emergency response action, the U.S. Environmental Protection Agency removed abandoned chemicals and equipment and excavated shallow soil in areas without asphalt or concrete coverings. The former plating facility site was separated into two separate parcels in 2016 designated as APN 1-223-7 and 1-223-6. Case RO0003174 was opened in 2015 for APN 1-223-7. Residual soil contamination at the site is covered by a cap consisting of the site building and asphalt and concrete paving.

Completed Sub Area Name:	Not reported
Completed Document Type:	Phase 1
Completed Date:	07/27/1995
Comments:	Pursuant to the MOU, DTSC has reviewed a Phase I Preliminary Environmental Assessment for Asian Health Services (AHS). The subject property currently contains a vacant three-story commercial office building. AHS is proposing to remodel the building in order to accommodate a community health clinic. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property; there was no contamination on the property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pilot/Treatability Study Report
Completed Date: 05/29/2015
Comments: The objective of the in-situ thermal remediation pilot study was to demonstrate the ability of in-situ thermal desorption to reduce target volatile organic compound concentrations in the soil and groundwater at the site. The results of the pilot test demonstrate that the use of in-situ thermal desorption technology is effective in the removal and/or reduction of target volatile organic compounds from soil and groundwater at the site.

Completed Document Type: Site Characterization Workplan
Completed Date: 04/20/2018
Comments: The Final Work Plan, Site Characterization for Thermal Remediation System (Work Plan) and associated Health and Safety Plan (HASP) were prepared as required by Contract 16-T4290, Work Order No. 1, issued to Engineering/Remediation Resources Group, Inc. (ERRG) on March 19, 2018. The Work Plan outlines the methodology for collecting additional samples to design the thermal conductive heating system for the Site, and the HASP was prepared to minimize risk of occupational accidents or exposures while conducting the sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/04/2018
Comments: Fieldwork consisting of soil, groundwater, and soil vapor sampling was completed on May 4, 2018. The results of the sampling will be used to help inform design parameters for future remediation work at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 04/13/2018
Comments: DTSC sent out a work notice to inform the community of field work scheduled between April 23, 2018 and April 27, 2018. The field work includes up to 17 samples being collected from the Site. All work is to be conducted between the hours of 8:00 am and 5:00 pm.

Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 08/21/2020
Comments: The Off-Site Groundwater Investigation Report outlines the results of investigations performed near the Lane Metal Finishers Site to determine whether previous remediation activities were effectively preventing migration of contamination in groundwater to the surrounding area. Five grab groundwater samples were collected and analyzed for volatile organic compounds. Four of the five grad groundwater samples did not detect any of the Site's chemicals of concern (COCs). Trichloroethylene and other Site COCs were detected in one sample. The report recommended installation of new groundwater monitoring wells and collection of additional samples, and to install a groundwater barrier on the western side of the Site.

Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 08/13/2018
Comments: The Removal Action Implementation Workplan outlines the methodology for: excavation and removal of soils impacted by metals; collection of soil confirmation samples; backfilling the excavation; installation and operation of an in-situ thermal remediation (ISTR) system; collection of soil, soil vapor, and groundwater samples to evaluate system performance; and removal of the ISTR system. Approximately 100 cubic yards (160 tons) of impacted soils will be removed to depths up to approximately 3 feet below ground surface. The ISTR system will consist of 51 thermal conductive heating wells, 16 dual phase extraction wells, and six thermocouple wells. The entire ISTR system will be installed under a four-inch-thick concrete cap. The ISTR system design plans will be provided to DTSC under separate cover for approval before installation begins.

Completed Date: 08/21/2020
Comments: The Off-Site Groundwater Investigation Report outlines the results of investigations performed near the Lane Metal Finishers Site to determine whether previous remediation activities were effectively preventing migration of contamination in groundwater to the surrounding area. Five grab groundwater samples were collected and analyzed for volatile organic compounds. Four of the five grad groundwater samples did not detect any of the Site's chemicals of concern (COCs). Trichloroethylene and other Site COCs were detected in one sample. The report recommended installation of new groundwater monitoring wells and collection of additional samples, and to install a groundwater barrier on the western side of the Site.

Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 08/13/2018
Comments: The Removal Action Implementation Workplan outlines the methodology for: excavation and removal of soils impacted by metals; collection of soil confirmation samples; backfilling the excavation; installation and operation of an in-situ thermal remediation (ISTR) system; collection of soil, soil vapor, and groundwater samples to evaluate system performance; and removal of the ISTR system. Approximately 100 cubic yards (160 tons) of impacted soils will be removed to depths up to approximately 3 feet below ground surface. The ISTR system will consist of 51 thermal conductive heating wells, 16 dual phase extraction wells, and six thermocouple wells. The entire ISTR system will be installed under a four-inch-thick concrete cap. The ISTR system design plans will be provided to DTSC under separate cover for approval before installation begins.

Completed Document Type:	Removal Action Workplan
Completed Date:	08/06/2018
Comments:	The Final Removal Action Workplan identifies excavation of an estimated 100 cubic yards (160 tons) of shallow metals-impacted soil and off-site disposal at a permitted landfill, followed by the installation and operation of an in-situ thermal remediation system to remove volatile organic compounds from deeper soils as the remedy for the Site.

LANE METAL FINISHERS (Continued) **S118757135**

Completed Document Type:	State/Federal Funded Site Contract
Completed Date:	09/18/2018
Comments:	Contract Number 17-T4436, Amendment Number 1, adds $520,000 to the original Contract. A Scope of Work and Budget Detail are attached as exhibits to the Amendment.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	State/Federal Funded Site Contract
Completed Date:	11/21/2018
Comments:	Amendment 2 to Contract 17-T4436 between DTSC and their contractor, Engineering/Remediation Resources Group, Inc. (ERRG), to reflect an additional $500,000 in funding for the contract for work to be performed at the Site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	State/Federal Funded Site Work Order
Completed Date:	03/19/2018
Comments:	DTSC issued Work Order Number 1 for the Lane Metal Finishers Site under Contract 16-T4290 to Engineering/Remediation Resources Group, Inc. (ERRG) authorizing them to commence work. The Scope of Work for the Work Order is for Removal Action Workplan Implementation, which includes the preparation of various workplans.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	State/Federal Funded Site Work Order
Completed Date:	10/01/2018
Comments:	Stop work order issued to Engineering/Remediation Resources Group, Inc. for Contract 16-T4290 which expired on September 31, 2018.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	CEQA - Initial Study/ Neg. Declaration
Completed Date:	08/06/2018
Comments:	DTSC prepared a Negative Declaration and an Initial Study to comply with the California Environmental Quality Act. DTSC determined that removal actions proposed in the Draft Removal Action Workplan would not have a significant effect on the environment, and that no mitigation measures would be required. The Negative Declaration and Initial Study were made available for public review, and no comments were received on it from either the public or other government agencies during the review period. DTSC approved the Final Removal Action Workplan and prepared and submitted to the State Clearinghouse a Notice of Determination.
Completed Area Name:	PROJECT WIDE

6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 09/30/2019. The business failed to establish and electronically submit adequate emergency response procedures for a release or threatened release of hazardous material. There were no emergency response procedures for a release or threatened release of a hazardous material available for review at the time of the inspection. At the time of the inspection, Alameda County Department of Environmental Health assisted the facility to establish and electronically submit adequate emergency response procedures for a release or threatened release of hazardous material. Facility representative submitted a complete Consolidated Emergency Response/Contingency Plan to the California Environmental Reporting System at the time of the inspection.

Eval Date: 09-30-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Alameda County Department of Environmental Health (ACDEH) inspector onsite to perform an unannounced Hazardous Waste Generator and Hazardous Materials Business Plan (HMBP) inspection at ABP Repair Inc. located at 1009 7th St Oakland, CA 94607 and met with Bryan Jorgensen, Owner, who gave consent and assisted ACDEH with the inspection. Facility operates as an auto repair shop conducting oil changes and antifreeze changes. The facility began operations in October 2017 according to the Owner. The previous facility, Performance Options, was sold by Eddy Wong to the new owner. Eddy Wong is now the landlord. Alameda County Department of Environmental Health Operating Permit is valid from 10/1/2018 - 11/30/2019.

Status Date:	05/08/2018
Case Worker:	MD
RB Case Number:	01-1778
Local Agency:	ALAMEDA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0000036
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. TPHg was detected in a soil sample from the UST tank pit collected following removal of the UST at a concentration of 680 mg/kg, and in a stockpile soil sample at a concentration of less than 100 mg/kg. Benzene was detected at a concentration of 11 mg/kg at the bottom of the tank pit. Site investigations were conducted from 1988 to 2006 to evaluate the extent of subsurface impacts both onsite and offsite to soil and groundwater from the fuel release. Groundwater samples were collected from an onsite groundwater monitoring well (MT/W-1) in 1988, 1992 and

VEND MART PROPERTY (Continued) **S101293799**

2006 and an onsite boring (MT/B-1) in 1991. Soil samples were collected from two onsite borings (MW-1 and MT/B-1 and five offsite borings (B-1, B-2, B-3, B-4, and B-5) advanced in 1991 immediately downgradient of the property and release by Cal-Trans during the I-880 realignment project. Soil bores B-1 to B-3 are considered downgradient of the release, and soil bores B-4 and B-5 are considered crossgradient from the release. No remediation other than the UST removal and excavation of the tank pit has been conducted. This UST release case has been evaluated for closure consistent with the State Water Resource Control Boards Low-Threat Underground Storage Tank Closure Policy (LTCP) for petroleum related contaminants. ACDEH has determined that the site meets all the LTCP General and the Media Specific Criteria for Groundwater. The site does not meet the Media Specific Criteria for Vapor Intrusion to Indoor Air and the Media Specific Criteria for Direct Contact. However, based on an analysis of site specific conditions a determination has been made that the residual contamination in soil and groundwater at the site poses a low threat to human health and safety and to the environment under current and reasonably anticipated near-term future scenarios,. Refer to Attachments 4 through 7 in the closure summary for detailed information on the LTCP evaluation.

Completed Date: 12/02/2020
Comments: Annual Report summarizing the sub-slab depressurization (SSD) system O&M and sampling procedures for 2019. The first comment letter (sent 10/2/2020) requested submittal of a revised O&M Plan. The property recently changed ownership and changes may occur to the SSD system, which would affect the O&M Plan. The revised O&M Plan was requested to be submitted after these changes are better understood. The 10/2/2020 letter also included recommendations to be included in the revised O&M Plan and requested a Response to Comments to be included with the revised Report. A Response to Comments was included in the revised Report. These Response to Comments will be further reviewed when we receive and review the revised O&M Plan.

B, Assessor s Map . The Property is located in the area now generally bounded by 5th Street on the north, 4th Street on the south, Brush Street on the east, and Market Street on the west. The Property is also identified as County of Alameda, Assessor Parcel Numbers 001-0113-001-02 and 001-0113-002-02. This Property has been investigated and/or remediated under the Department s oversight. The Department approved a Corrective Measures Study (CMS), dated April 2, 2015, and an Operations and Maintenance Plan and Monitored Natural Attenuation Plan, dated February 19, 2016, in accordance with Health and Safety Code, division 20, chapter 6.5. The remediation activities conducted at the Property include installation and continued operation and maintenance of the sub-slab depressurization system, monitored natural attenuation for groundwater, and land use restrictions. As part of the DTSC-approved remedy at the Site, the sub-slab depressurization system layout and a monitoring well location diagram showing the location(s) of the installed remedy are attached as Exhibit C and Exhibit D.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 09/04/2012
Comments: Revised Risk Assessment Report. The conservative RA performed for the site indicated potential site-related risks and hazards above target levels for some chemicals in soil, groundwater, and soil vapor. Specifically, elevated risk and hazard estimates for onsite receptors were associated with benzo(a)pyrene in soil, TPHms in groundwater, and 1,2,4-trimethylbenzene, benzene, and ethylbenzene in soil vapor. 1,4-Dichlorobenzene and PCE in soil vapor also contributed, but to a lesser extent, to the elevated risk estimates. Offsite risks that were considered to be potentially site-related were mainly due to 1,2-DCA, PCE, and 1,1-DCA in groundwater. Each of the exposure scenarios associated with these elevated risks and hazards is further discussed within the Report. Target concentrations for chemicals in onsite groundwater and soil vapor were developed to assist with future site monitoring and management decisions. Based on recent comments from DTSC (2012b) for another S-K site in California, single chemical values, rather than multiple chemical adjusted values, were calculated. Target concentrations were determined by identifying the concentrations of each chemical in groundwater or soil vapor that would result in a risk estimate of 10-6 or a hazard quotient of 1 (whichever was lower). These values could be used to determine when operation of the SSD system, or continuation of long-term monitoring, is no longer necessary, or to assist with remedial or mitigation efforts in the event of a future land use change. Target groundwater and soil vapor concentrations are shown in Table 26, and summarized within the Report.

Comments:	Corrective Measures Study Update. Per the April 2014 DTSC-approved CMS Work Plan, Safety-Kleen Systems, Inc. (S-K) and DTSC agreed to evaluate data from a minimum of two consecutive quarterly groundwater monitoring events in April 2014 and July 2014. Pending results of the April and July 2014 monitoring events, S-K and DTSC would determine if two additional quarterly events are appropriate to evaluate monitored natural attenuation (MNA) as a remedial strategy for the site. The purpose of this letter report is to present the data collected during the April 2014 and July 2014 CMS quarterly groundwater monitoring events, and reach concurrence with DTSC on a path forward in finalizing submittal of the CMS Report. S-K believes that data presented in this letter report shows ample and appropriate evidence that MNA is a strong remedial option and would prefer to move forward with submittal of the CMS Report. If DTSC agrees that two additional quarterly MNA events are not necessary to complete the CMS, S-K intends to submit the CMS Report within 30 days of receiving formal DTSC concurrence. In the event that DTSC prefers additional information for evaluating MNA, the CMS will progress in general accordance with the timeline in the approved CMS Work Plan (two additional quarterly monitoring events and submittal of the CMS Report on or before March 31, 2015). DTSC approves the Update and agrees that no further monitoring for MNA evaluation is necessary.

Comments:	FACILITY CLOSURE WORKPLAN, September 21, 2006. Resource Conservation Recovery Act (RCRA) closure activities are anticipated to occur in 2006. Closure of this facility will include decontamination of the hazardous waste management units (HWMUs). The maximum waste inventory at the facility is 21,754 gallons based on the HWMUs capacities: Tank Storage: One nominal 12,000-gallon double-walled UST (underground storage tank) used to store spent parts washer solvent. Return/Fill Shelter: Two drum washer units and the Return/Fill Shelter (maximum of 1,500 gallons of sediment). Container Storage: Two container storage areas with a total waste storage capacity of 8,254 gallons.

Additional groundwater data at the facility has been further characterized and an indoor air investigation was completed to further evaluate the effectiveness of the SSD system. PCE and TCE, the two primary constituents of concern identified during 2011/2012 soil gas sampling, were not detected in the March 2013 indoor air samples. Acrolein, benzene, and carbon tetrachloride were detected in indoor air above RSLs, but at similar concentrations to background. Chloroform was detected in three indoor air samples above the residential RSL but below the industrial RSL. Chloroform is commonly detected in indoor air and often attributed to use of water from chlorine treated water systems. Ethylbenzene was detected above the residential RSL, but also below the industrial RSL in all samples. Potential indoor air sources of ethylbenzene include paint, paint thinner, wood office furniture, scented candles, and gasoline. Information provided in the September 2012 RFI Report indicated the current SSD system met industry standard pressure differential benchmarks within the building. Evaluation of the March 2013 indoor air data further supports the SSD system is effective in mitigating potential vapor intrusion attributable to soil gas impacts beneath the building. March 2013 groundwater data was generally consistent with historical results. It should be noted that the March 2013 TPH-MS concentration in the sample collected from well MW-14 (2.11 mg/L) was lower than the October 2011 grab groundwater sample concentration (7.66 mg/L) collected in the same vicinity. However, the March 2013 concentration still exceeds the target level of 1.0 mg/L identified in the Revised Risk Assessment Report.

Completed Date: 05/05/2017
Comments: Revised Sub-Slab Depressurization System 2016 Annual Operation Summary (Report), May 4, 2017. The Sub-Slab Depressurization (SSD) system was monitored and sampled by a qualified environmental professional in 2016 on a quarterly basis in accordance with the Permit. During quarterly O&M activities, the system was inspected to verify fans were running and providing vacuum as designed. Safety-Kleen Systems, Inc. (S-K) observed that the fan attached to riser SP-1 was inoperable during the June 22, 2016, quarterly O&M event. A new fan was installed to the same riser on June 28, 2016. The former fan attached to riser SP-1 was operational during the March 2016 quarterly event; therefore, it is estimated that fan SP-1 was nonoperational for a maximum period of 3.5 months, during which time all other SSD fans operated continuously. A manual that includes product specifications for the replacement RadonAway HS5000 high suction fan is included as Attachment B. S-K performed quarterly sampling of the SSD system according to the procedures outlined in the February 2016 Plan. S-K collected air flow readings from each exhaust stack on the roof of the building using a VelociCalc anemometer. Vapor samples were collected from exhaust stack SP-2 on a quarterly basis in 2016. Analytical laboratory reports for samples collected during 2016 are included as Attachment C. Field notes for the quarterly events are included as Attachment D. Calibration information for the anemometer is included as Attachment E. A summary

of individual effluent VOC concentrations detected in each sample is included as Table 1. Air flow readings and magnehelic gauge readings are included as Table 2. Calculated VOC removal rates, in pounds per day (lbs/day), are included as Table 3. Because the SSD emission stacks extract commingled vapor beneath the slab, the maximum concentration of individual and total VOCs was used to conservatively calculate daily VOC removal rates for comparison to Permit limits. The mass removal rates for the 2016 operation period, ranged from 0.00017 to 0.00174 lbs/day and were well within Permit conditions of 10 lbs/day. In a letter dated May 5, 2017, DTSC approved the Report and provided the following comment and requirement for future monitoring/sampling and reporting: The Report Attachment E, TSI Model 8360 VelociCalc Calibration Certificate, states, Calibrations are valid for one year. However, the DTSC-approved Sub-Slab Depressurization System Operation and Maintenance Plan and Monitored Natural Attenuation Plan (Plan), dated February 19, 2016, states, All instruments will be calibrated according to manufacturer s specifications prior to use. (2-1) The TSI Model 8360 VelociCalc or other anemometer (air velocity meter), used for measuring and recording air velocity through the sub-slab depressurization system extraction pipes, must be calibrated prior to each monitoring and sampling event scheduled quarterly in March, June, September, and December.

Comments: Pursuant to the September 21, 2009 Corrective Action Consent Agreement (CACA), the Department of Toxic Substances Control (DTSC) issues this RCRA Corrective Action Completion Determination for the Safety-Kleen Systems, Incorporated (S-K) property located at 400 Market Street, Oakland, Alameda County, California 94607 (Site). S-K is the owner of the Site. On October 17, 2017, DTSC issued a Cleanup Complete (CC) determination that Cleanup Complete - Controls Required Long Term Stewardship has been achieved. The facility was completely characterized and assessed with respect to all media onsite and offsite (if applicable), and not all media met cleanup requirements. Noncompliant media were remediated so that no further operation of engineered remedies is required for industrial land use. Nevertheless, some amount of hazardous waste still remains beneath the facility and limited periodic examination and care are required to continue into the long-term future to ensure that certain installed engineered barriers, covers, caps, fences, signage, etc. and certain active and/or passive remedies, e.g., SSDS and MNA, remain efficacious. A No Further Action Determination is not applicable.

Completed Document Type: RFI Report
Completed Date: 05/20/1996
Comments: RCRA FACILITY INVESTIGATION (RFI) REPORT, March 27, 1996. The focus of the RFI activities was to define the presence and extent of potential impacts associated with SWMUs (Solid Waste Management Units) and AOC (Area of Concern) and on collecting data to evaluate potential corrective measures. Safety-Kleen believes that the site characterization activities which have been completed adequately assess the subsurface in the vicinity of SWMU No. 2, SWMU No. 3, and AOC No. 1. Investigation of SWMU No. 1 will be conducted as part of facility closure or partial closure activity. Safety-Kleen does not propose to conduct additional site characterization work at this time. Safety-Kleen requests that the soil vapor extraction (SVE) system be considered the final interim corrective measure. The operation of the SVE system and the product recovery system is continuing Safety-Kleen will not initiate groundwater extraction and treatment at this time due to the encroaching VOC plume. Groundwater extraction will only be considered when mitigation of the upgradient source the VOCs has been performed by the responsible parties.

kept to document maintenance, repairs, and replacements performed on the SSDS. A schedule for planned O&M visits and quarterly sampling is presented in Table 1. Field readings and laboratory data are evaluated every quarter to confirm emission rates are within BAAQMD Permit limits. Field readings and data are kept available and on file per current BAAQMD Permit conditions. S-K will submit a summary of field readings and results to the DTSC on an annual basis. Quarterly laboratory data, field readings, and equipment replacement information will be submitted to DTSC on or before the last day of January of each calendar year. Natural attenuation involves the breakdown of constituents of concern (COCs) by microbial degradation processes. MNA includes monitoring the groundwater conditions that indicate natural attenuation is occurring. As part of the approved remedy for the site, S-K will evaluate attainment of cleanup levels in groundwater by conducting routine groundwater monitoring at the site once every five years, with an estimated time frame of fifteen years (4 events total over estimated 15 years). Consistent with the Corrective Measures Study (CMS), S-K will gauge and sample monitoring wells MW-1, MW-2R, MW-3, MW-4, MW-8R, MW-11R, and MW-14, during each monitoring event. Groundwater samples will be submitted for VOCs, TPH-MS, and TPH-D. S-K will implement the first MNA event within 60 days of DTSC approval of this document, with the following three events occurring approximately every five years. S-K will evaluate and compare groundwater data to the corrective action objectives (CAOs) defined by the CMS. S-K will submit groundwater-sampling reports to the DTSC, for each event, within 60 days receipt of complete and accurate laboratory data. A proposed schedule for groundwater sampling is presented in Table 2. S-K proposes to abandon monitoring wells MW-5, MW-6 and MW-12 because they are no longer included in the monitoring plan. Additionally, S-K proposes to plug and abandon soil gas wells SVW-1, SVW-2, SVW-3, SVW-6, SVW-7, SVW-8, and SVW-9 as they were utilized for the previous RFI activities. S-K will leave soil gas wells SVW-4, SVW-5, SVW-10, SVW-11, and SVW-12 in place in the event future soil gas sampling on the perimeter of the building is warranted. A figure showing proposed abandonment locations is provided as Figure 4.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/11/2021
Comments: Groundwater sampling required every five years. A letter was provided to DTSC, notifying of upcoming groundwater well maintenance activities and sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/01/2016
Comments: The monitoring event included water level measurements and/or sampling of groundwater monitoring wells MW-1, MW-2R, MW-3, MW-4, MW-8R, MW-11R, and MW-14. Groundwater samples were analyzed for volatile organic compounds (VOCs) by EPA Method 8260B and total petroleum hydrocarbons reported as mineral spirits and diesel (TPH-MS and TPH-D) by EPA Method 8015.

Completed Date: 10/15/2014
Comments: Quarterly Progress Report (July through September 2014). Per the approved CMS Work Plan, Safety-Kleen Systems, Inc. (S-K) performed two consecutive quarterly groundwater-sampling events the weeks of April 14, 2014, and July 7, 2014. S-K submitted an August 29, 2014, letter style CMS Update Report to DTSC, documenting results of April and July 2014 field activities, and a recommendation that the two additional consecutive quarters of groundwater sampling were not necessary to move forward with the CMS report. DTSC approved the CMS Update Report in a letter dated September 18, 2014, and requested that S-K provide a formal CMS Report. S-K intends to submit the CMS Report to DTSC on or before October 17, 2014.

Comments:	Quarterly Progress Report (April through June 2014). Per the approved CMS Work Plan, Safety-Kleen Systems, Inc. (S-K) performed a groundwater sampling event the week of April 14, 2014, and implemented the second consecutive quarterly event the week of July 7, 2014. As documented in the June 27, 2014 Field Activity Notification Letter, S-K intends to submit a summary of the data collected during the April and July 2014 monitoring events, on or before September 1, 2014, to the DTSC. The submittal will contain recommendations to whether two additional consecutive quarterly groundwater monitoring events are needed as part of the CMS.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Waste Description: 2,4,5-TRICHLOROPHENOL

Waste Code: D042
Waste Description: 2,4,6-TRICHLOROPHENOL

Waste Code: D043
Waste Description: VINYL CHLORIDE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Quarterly Update:	Entered 8/27/04 - The Oakland Service Center is a service and operation center which leases and services Safety-Kleen parts cleaning equipment and solvents to Safety-Kleen customers. The service center also collects spent parts washer solvents, aqueous-based solvents, dry cleaning wastes, spent silver-bearing waste and transfer wastes. Transfer wastes include industrial solvents, Freon, antifreeze, and paint waste/laquer thinners. The facility s hazardous waste storage permit expired in March, 1997. Safety-Kleen submitted a permit renewal application (Application) for the facility on February 14, 1997. Immediately after the completion of technical review of the revised Part B Application with three Notices of Deficiencies (NODs), Safety-Kleen submitted supplements to the facility s permit renewal application to add three new waste streams (aqueous cleaners, used oil and used antifreeze) to be managed in the underground storage tank (UST) at the facility. The 12,000-gallon UST is currently only permitted for storage of spent parts washer solvent. The Fiscal Year 2004/2005 Annual Work Plan calls for completion of technical review of the Application, preparation of draft permit, issuance of draft Neg Dec, public participation, and final permit determination. Update 6/29/07 - On April 17, 2006, SK notified DTSC that they intend to terminate their permitted activities and thus close the Oakland facility. The permitted units are: Tank Storage (one nominal

12,000-gallon double-walled underground storage tank used to store spent parts washer solvent), a Return/Fill Shelter (two drum washer units that hold a maximum of 1,500 gallons of sediment), and Container Storage (two container storage areas with a total waste storage capacity of 8,254 gallons). DTSC reviewed the closure plan of April 25, 1994 and determined that it was not up to current standards, and as a result, DTSC provided comments to SK on August 14, 2006. SK submitted a revised closure plan on September 21, 2006 by a Class 1 Permit Modification. The revised

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RISK AND TECHNOLOGY REVIEW
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
SUPERFUND (NON-NPL)
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
